

Chino Hills, California

Indicators Report

by
The National Economic Education Delegation (NEED)

April 20, 2024

Exploring the economics, demographics, and well-being of Chino Hills and its residents through indicators.

This report was produced by the:

National Economic Education Delegation

Executive Summary

Assessing the City with Indicators

About this Report

This report provides background or summary information for the city of Chino Hills (the City) in the form of indicators.

Using this Report

Indicators are measures of various aspects of a regional economy. They help to provide an indication of the quality of life in a region and progress toward improving conditions in the local economy. This report focuses on indicators

for changing demographics, incomes, housing markets, commute patterns, and employment in Chino Hills. These indicators are compared to San Bernardino County (the County) as a whole, a broader region where one is well defined, California, and the United States.

This report is vital for understanding trends in the underlying economy. It does not provide forecasts, but Rob Eyler and Jon Haveman at Economic Forensics and Analytics are available to provide them if that is of interest.

Topics Covered:

- **Demographics:** A detailed snapshot of Chino Hills demographics is presented. This provides evidence on the size, age and sex, income and poverty status, race and ethnicity, housing status, living arrangements, education, health, and transportation choices of the population. Beyond the current population level, data on trends in local population growth, in comparison with other broader regions is presented, in both tabular and graphical form.
- **Employment Report:** Here, we provide a brief snapshot of employment and unemployment in Chino Hills and how the City's experience differs from broader regions.
- **Income and Earnings:** Vital to understanding the prosperity of a city relative to its surrounding area is information on income and earnings. We provide a ranking of the City's income relative to all cities in California as well as growth relative to local regions. Inequality and poverty status are also important indicators for the level of equity in the community. We provide evidence of trends in both, not only for all residents, but also for children separately.
- **Housing:** This section provides evidence on the cost and availability of housing. Both median home values and rental costs are included, along with detailed information on home ownership, by age and income, in particular. Further, evidence is provided on the housing burden in the City, again, in comparison with other broader regions. We also provide evidence on the rate at which new buildings and units are permitted along with a broader housing picture. Finally, we provide evidence on the age of the housing stock in Chino Hills, along with information on how long the City's residents have been in place.
- **Transportation:** Increasingly important, in the wake of the pandemic, is an understanding of the transportation patterns and choices of local residents. We provide detailed evidence on the proportion of residents who work from home and on the various transportation choices of those who head to the office. This information is also provided for those who work in Chino Hills, but do not necessarily live in Chino Hills.
- **Migration:** Population changes comes primarily through organic causes: births and deaths. Migration between regions also plays a significant role in population growth. A final section of the report provides evidence on migration into and out of the City.

Demographics

Definition:

Data on the demographics of a city indicate the nature of the population, with a focus on age, gender, race and ethnicity, as well as household composition.

Why is it important?

The characteristics and growth of Chino Hills's population are fundamental indicators of the city's growth potential.

A Demographic Snapshot

Statistic	2022	2019
POPULATION		
Population Estimate (#, 5yr)	78,223.0	80,701.0
Veterans (#, 5yr)	2,250.0	3,055.0
Foreign born persons (% , 5yr)	32.4	29.6
Population age 25+ (#, 5yr)	53,786.0	54,696.0
AGE AND SEX		
Persons under 5 years (% , 5yr)	6.1	5.9
Persons under 18 years (% , 5yr)	22.2	22.7
Persons 65 years and over (% , 5yr)	13.2	11.4
Female persons (% , 5yr)	49.8	51.3
INCOME AND POVERTY		
Median household income (\$, 5yr)	117,548.0	106,347.0
Per capita income in past 12 months (\$, 5yr)	46,826.0	39,607.0
Persons in poverty (% , 5yr)	7.2	6.0
Children age less than 18 in poverty (#, 5yr)	1,419.0	976.0
Children age less than 18 in poverty (% , 5yr)	8.2	5.4
RACE AND ETHNICITY		
White alone (% , 5yr)	32.9	47.7
African American alone (% , 5yr)	4.1	3.7
American Indian or Alaska Native alone (% , 5yr)	0.4	0.7
Asian alone (% , 5yr)	40.0	35.2
Native Hawaiian and Other Pacific Islander alone (% , 5yr)	0.1	0.1
Two or More Races (% , 5yr)	13.4	4.6
Hispanic or Latino (% , 5yr)	28.7	28.8
White alone, not Hispanic or Latino (% , 5yr)	23.7	29.5
HOUSING		
Housing units (#, 5yr)	25,945.0	26,565.0
Owner-occupied housing units (% , 5yr)	70.5	74.9
Median value of owner-occupied housing units (\$, 5yr)	776,200.0	622,300.0
Median selected monthly owner costs-with a mortgage (\$, 5yr)	2,983.0	2,562.0
Median selected monthly owner costs-without a mortgage (\$, 5yr)	868.0	753.0
Median gross rent (\$, 5yr)	2,575.0	2,136.0
FAMILIES AND LIVING ARRANGEMENTS		
Households (#, 5yr)	25,148.0	25,289.0
Persons per household (#, 5yr)	3.1	3.2
Living in same house 1 year ago, % of persons age 1+ (5yr)	86.8	86.0
EDUCATION		
High school graduate or higher, % of persons age 25+ (5yr)	93.6	93.7
Bachelor's degree or higher, % of persons age 25+ (5yr)	49.9	46.7
HEALTH		
With a disability, under age 65 years (#, 5yr)	2,454.0	2,870.0
Persons without health insurance, under age 65 years (% , 5yr)	4.8	4.2
LABOR FORCE		
In civilian labor force, persons age 16+ (% , 5yr)	65.2	65.3
In civilian labor force, women age 16+ (% , 5yr)	58.2	56.8
Employed, persons age 16+ (% , 5yr)	58.7	59.5
Self employed (% , 5yr)	10.7	12.1
TRANSPORTATION		
Mean travel time to work, workers age 16+ (Mins., 5yr)	32.6	37.4
Drive alone in private vehicle (% , 5yr)	75.7	83.1
Using public transportation (% , 5yr)	1.1	1.8
Worked from home (% , 5yr)	15.4	5.9

Note: Data are from the 1-year files unless indicated by the notation 5yr.

Current Population

The data in these two tables and the following two graphs are from the CA Department of Finance (DOF). The DOF produces population estimates for geographies around California twice a year: January and July. As estimates for cities are only available in January, these two tables are based on the January data. The remaining figures are from the American Community Survey (ACS), provided annually by the U.S. Bureau of the Census.

Table 1. Population Change by Region
(Thousands, January to January)

Region	2023 Population	% Change		
		1 Year	3 Year	5 Year

Employment Report

Citywide Employment and Unemployment

Definition:

Each month, California's Employment Development Division (EDD) publishes an update on employment in California and in MSAs, counties, and cities all across the state. The report focuses primarily on non-farm employment, providing estimates of changes in em-

ployment by industry as well as unemployment in each region. Data for cities is limited to aggregate employment, labor force, and unemployment data. Those are reported below.

Why is it important?

Employment growth is a fundamental indicator of the health of an economy.

Table 3. Chino Hills Summary for March, 2024

Category	Current Value	Change From:		
		Last Month	2 Months Ago	Last Year
Employment	8,924	-30	-53	-103
Labor Force	9,644	9	15	96
Number Unemployed	678	-4	21	97
Unemployment Rate	7.0	-0.0	0.2	0.9

County Employment by Industry

California's Employment Development Division (EDD) does not regularly produce data on employment by industry for cities. However, we are able to report industry-level employment data for San Bernardino County. The following table provides the latest data for the County.

Table 4. Employment Growth by Industry in San Bernardino County for March, 2024

Industry	Employment	Share	Empl Growth	% Growth - Annualized Rate					
				Month	Qtr	6mo	1yr	3yr	5yr

Income and Earnings

Per Capita Income Growth

Definition:

Per capita income is the average income per person in Chino Hills. Personal income is the income received by, or on behalf of, all persons from all sources: from participation as laborers in production, from owning a home or unincorporated business, from the ownership of financial assets, and from government and business

in the form of transfer receipts. Noncash government benefits are not included.

Why is it important?

Income is the money that is available to persons for consumption expenditures, taxes, interest payments, transfer payments to governments and the rest of the world, or for saving. As such, it is an important indicator of economic well-being in a community.

Figure 28: Income Levels

Figure 29: Growth over Time

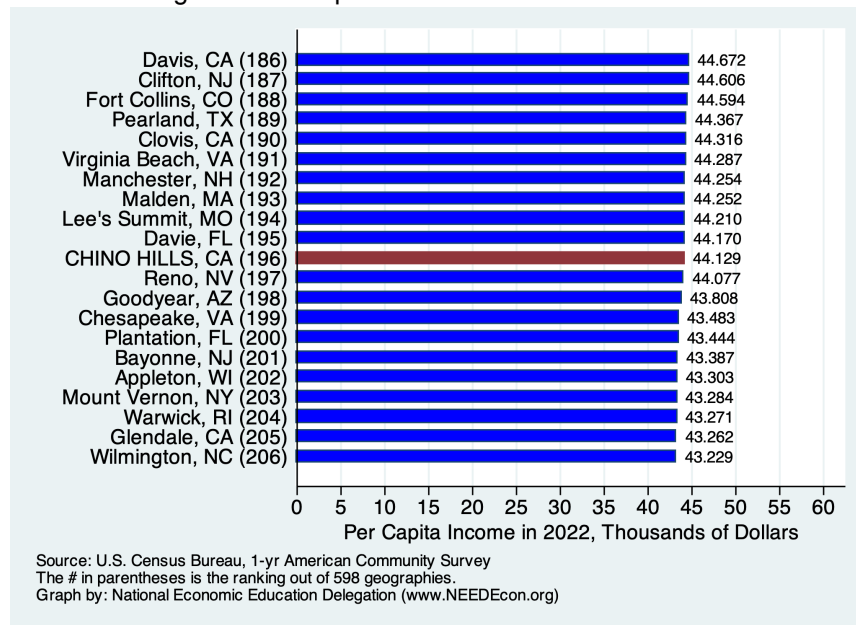

Figure 30: Comparison with All Cities Nationwide

Poverty and Inequality

Definition:

The local poverty rate provides an indication of the well-being of those at the bottom of the income distribution. The federal poverty rate measures the proportion of households in the region that are classified as living in poverty. Also included are measures of the extent to which the City's children are impoverished. Measures of the income distribution provide

further evidence on disparities in income in the region and how those disparities have changed over time.

Why is it important?

It is important to track measures of poverty and inequality to assess the extent of income disparities in the region, with an eye toward understanding how well the local economy is performing for all of its citizens.

Figure 31: Inequality

Figure 32: Shares Across the Income Distribution

Figure 33: Means Across the Income Distribution

Housing

Housing Costs and Affordability

Definition:

Housing costs are measured in several different ways. First, we provide evidence on the evolution of median home prices, median rental price, and finally through evidence on the housing burden in the city and comparison regions. Housing burden is defined as a household needing to commit more than 30% of their household income toward housing costs. The median value is the amount in the middle. Fifty

percent of units are above the median and 50 percent are below.

Why is it important?

Housing is one of three fundamental necessities, along with food and clothing. A measure of the cost of housing is an integral part of the measurement of the cost of living in a specific community. This is particularly true in cities and regions throughout the Bay Area, where housing costs are high relative to income.

Cost of Housing in Chino Hills and Broader Regions

Figure 45: Homeowner Housing Burden by Age

Housing Picture

Definition:

Housing costs are measured in several different ways. First, we provide evidence on the evolution of median home prices, median rental price, and finally through evidence on the housing burden in the city and comparison regions. The median value is the amount in the middle. Fifty percent of units are above the median and 50 percent are below.

Why is it important?

In areas where the rate of population growth exceeds the rate of housing growth, this is likely to reflect a tightening housing market. A tightening housing market will also likely be reflected in lower vacancy rates and higher occupancy rates. It may also be reflected in higher numbers of people per household.

Table 5. Housing Market Indicators

Indicator	2023	2019	2010	% Change from	
				2019	2010
Total Population	77,058.0	82,310.0	74,799.0	-6.4	3.0

Figure 50: Single Detached Homes

Figure 51: Single Attached Homes

Figure 52: Housing in Buildings with Two to Four Units

Figure 53: Housing in Buildings with Five or More Units

Vintage of Residential Housing

Why is it important?

This section provides evidence on the year in which residential housing in Chino Hills was built. We break it down into owned versus rented residences and provide a comparison across San Bernardino County and broader regions. A sense of the age of housing in a region provides an indication of the urgency with which a region might pursue additional hous-

ing. As the housing stock ages, an urgency with which renovations and rebuilds are permitted might result. All things equal, more recently constructed housing will be more likely to meet current codes and standards. Remodeling of existing units will be more desirable when existing units are, on average, older.

Figure 55: Housing Vintage across Regions

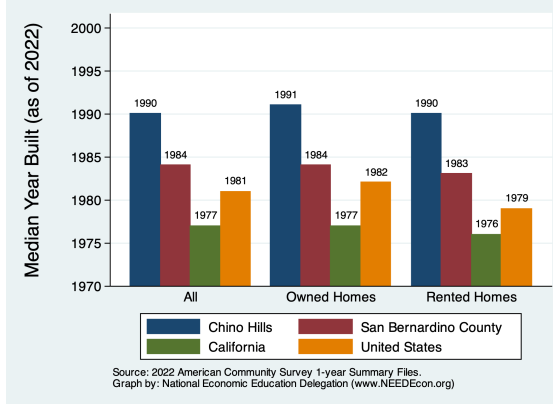

Figure 56: Housing Vintage by Tenure

Figure 57: Vintage of Owned Residences

Figure 58: Vintage of Rented Residences

Figure 59: Vintage of All Residences

Occupation of Residential Housing

Why is it important?

The duration of residence in a city is important for developing future policies regarding growing the local population. If a region is highly mobile, evidenced by most residences having

been recently occupied, a city might propose policies to reduce that mobility, or ask why the mobility happens. Policies could be put in place to either reduce or increase migration.

Figure 62: Year Occupied by Current Residents by Tenure

Figure 63: Year Occupied by Current Residents for Owned Housing

Figure 64: Year Occupied by Current Residents for Rented Housing

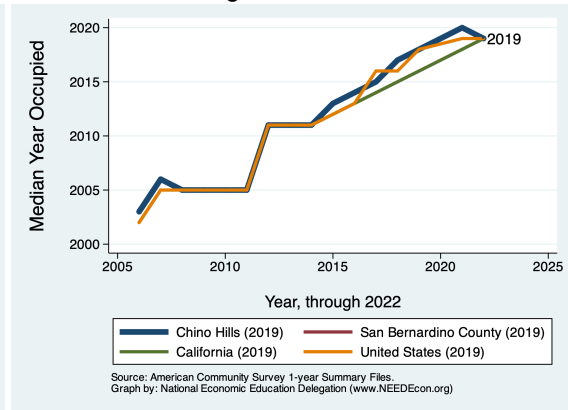

Figure 65: Year Occupied by Current Residents for All Housing

Residential Permitting

Definition:

This indicator provides evidence on the number of residential buildings that are permitted for construction each year. Permit data for Chino Hills is compared with data from San Bernardino County as a whole and broader regions. The statistic provided scales the number of permits by population. This is done to facilitate comparisons across regions.

Why is it important?

Building permits are the best indicator available of new units coming on the market. In order for a region's population to grow and flourish, new residential properties must be added to the existing stock. Building, both in the City and in the County more generally, is an indication of the extent to which new residences accommodate new residents or are affecting prices through increased supply.

Commute Patterns

During the recovery from the Great Recession, the period from 2010 to 2019, the Bay Area economy, and Silicon Valley in particular, has been growing at a pace roughly double that of the state as a whole and triple that of the nation. This growth has precipitated a tight hous-

ing market and also brought about some significant changes in commute patterns, many of which have been reversed by the pandemic. Recent years have seen significant changes in both the mode of transportation and commute times.

Mode of Transportation

Figure 75: Percent of Workers Commuting by Car Alone

Figure 76: Percent of Workers Commuting by Carpool

Figure 77: Percent of Workers using Public Transportation

Figure 78: Percent of Workers Who Work From Home

The first table on this page presents data for those who LIVE in Chino Hills. The second provides data on those who work, but do not necessarily live in Chino Hills. The final two columns provide for a comparison of commute mode choices of people locally with those in California more broadly.

Table 6. SEX OF WORKERS BY MODE OF TRANSPORTATION TO WORK

Place of Work

This section provides evidence on where workers living in Chino Hills work. As evidenced in the first table, some of Chino Hills's employed workers work in the City, but many do not. The first table and graph pair provide evidence at the county level while the second provide evidence with regard to working outside of the Chino Hills city boundary.

Table 10. SEX OF WORKERS BY PLACE OF WORK—STATE AND COUNTY LEVEL

Place of Work	Male		Female		All Workers		All of CA (%)
	#	(%)	#	(%)	#	(%)	
Worked in state of residence:	19,540	83.9	18,631	92.9	38,171	88.0	99.6

Commute Mode by Income

**Table 12. MEDIAN EARNINGS IN THE PAST 12 MONTHS
BY MEANS OF TRANSPORTATION TO WORK**

	City	California	Ratio	United States	
	Median	Median		Median	Ratio
Car, truck, or van - drove alone	50,865	48,335	98.0	45,677	96.5
Car, truck, or van - carpooled	53,661	35,926	139.0	34,518	134.7
Public transportation (excluding taxicab)	60,529	34,625	162.7	41,443	126.5
Walked	50,141	30,552	152.8	27,247	159.4
Taxicab, motorcycle, bicycle, or other means	141,277	40,631	323.6	36,218	337.9
Worked from home	67,137	79,738	78.4	69,180	84.1
Total:	53,522	49,818	107.4	46,365	115.4

Source: 2022 1-year American Community Survey, Summary File

Notes: 1) Ratio = the ratio of the regional median to either the CA or US median, relative to the Total ratio.

Values above 100 imply a high local median. Values below 100 imply a low local median.

For example, a value of 200 means that the local mean is 2x higher than would be expected.

For "Total:", ratio is simply the ratio of the medians.

2) For regions with more than one geography, the medians are averages weighted by working population.

Table 13. MODE OF TRANSPORTATION TO WORK BY WORKERS' EARNINGS

Migration

Overall Migration Flows

Definition:

The United States is a country with an increasingly mobile population. People move, migrate, from one place to another with increasing frequency.

Why is it important?

Having a handle on whether or not Chino Hills is a net recipient (migration inflows) or donor (migration outflows) of population is very im-

portant for understanding trends in the City's development. This section outlines migration patterns by age, education, income, marital status, and housing tenure. Understanding recent trends is very important for making policy, investment, and other decisions about the future. Also, understanding the extent to which the population is stable, or experiences significant turnover each year is helpful for planning purposes.

Figure 87: Overall Movements of Residents

Table 17: Migration by Income

Category	Population	Net Inflows				
		All Migration	Same State		Across States	From Abroad
			W/in County	Between Counties		
No income	11,461	769	97	528	-16	160

Source: 2022 5-year American Community Survey, Summary File

Note: The data in this and other tables in this section are limited in that there is no information on the City's population that has moved abroad.

The "From Abroad" column is gross movements into the City from abroad.

References and Sources

The majority of the data presented in this report are from the American Community Survey (ACS). For larger geographies, the 1-year Summary Files provide the data. For smaller communities, roughly those with less than 65,000 in population in 2021, the 5-year Summary Files provide the data.

The ACS data are supplemented by building permit data from the U.S. Census Bureau, population and housing data from the California Department of Finance, and home price and rental rates from Zillow.

U.S. Census Bureau. American Community Survey 1-year and 5-year Summary Files. <https://www.census.gov/programs-surveys/acs/data/data-via-ftp.html>. The 1-year data are released in September each year and the 5-year data are released in January.
