Driving Change – Autonomous Vehicles’ Big Impact

National Economic Education Delegation

Jon Haveman, Ph.D.

August 23, 2022

NATIONAL ECONOMIC
EDUCATION DELEGATION

1

National Economic Education Delegation

- **Vision**

- One day, the public discussion of policy issues will be grounded in an accurate perception of the underlying economic principles and data.

- **Mission**

- NEED unites the skills and knowledge of a vast network of professional economists to promote understanding of the economics of policy issues in the United States.

- **NEED Presentations**

- Are **nonpartisan** and intended to reflect the consensus of the economics profession.

NATIONAL ECONOMIC
EDUCATION DELEGATION

2

2

Who Are We?

- **Honorary Board: 54 members**

- 2 Fed Chairs: Janet Yellen, Ben Bernanke
- 6 Chairs Council of Economic Advisers
 - Furman (D), Rosen (R), Bernanke (R), Yellen (D), Tyson (D), Goolsbee (D)
- 3 Nobel Prize Winners
 - Akerlof, Smith, Maskin

- **Delegates: 651+ members**

- At all levels of academia and some in government service
- All have a Ph.D. in economics
- Crowdsource slide decks
- Give presentations

- **Global Partners: 48 Ph.D. Economists**

- Aid in slide deck development

3

Available NEED Topics Include:

- Healthcare Economics
- Climate Change
- Economic Inequality
- Economic Mobility
- US Social Policy
- Trade and Globalization
- Minimum Wage
- The U.S. Economy
- Immigration Economics
- Housing Policy
- Federal Budgets
- Federal Debt
- Black-White Wealth Gap
- Autonomous Vehicles

4

Credits and Disclaimer

- **This slide deck was authored by:**
 - Jon Haveman, NEED
- **This slide deck was reviewed by:**
 - Ronald Fisher, Michigan State University
 - William F. Fox, University of Tennessee, Knoxville
- **Disclaimer**
 - NEED presentations are designed to be nonpartisan.
 - It is, however, inevitable that the presenter will be asked for and will provide their own views.
 - Such views are those of the presenter and not necessarily those of the National Economic Education Delegation (NEED).

5

Outline

- **Where does the AV path lead?**
- **Transition**
- **Policy/Planning Issues**
- **Major Economic/Development Changes**

6

Autonomous Taxonomy

SAE AUTONOMY LEVELS

HUMAN

LEVEL 0
Human driver is in complete control. Maybe the car shifts its own gears, if you, you know, have fun.

LEVEL 1
Driver must be ready to take over at any time. Features like adaptive cruise control, parking assist with automatic steering, lane keeping assist, in any combination.

LEVEL 2
Automated system is doing most of the driving, including steering, braking, and accelerating, but humans must be alert and ready to take over at any time.

LEVEL 3
In specific situations and environments, like highway driving, the car is in complete control. Human driver can read or text or whatever if they want.

LEVEL 4
The car can drive itself independently in most environments, with some exceptions for weather or unusual environments. Humans may still need to take over at times.

LEVEL 5
All robot, all the time. Humans just along for the ride and, ideally, to tell the car where to go. No restrictions where the car can drive.

ROBOT

Growth Path

The self-driving vehicle revolution

An illustration of potential growth

Era 1: Fully autonomous vehicles (AVs) being developed for consumers

Era 2: Consumers begin to adopt AVs

Era 3: AVs become the primary means of transport

McKinsey & Company

NATIONAL ECONOMIC EDUCATION DELEGATION

8

8

WHEN?

What do the headlines say?

NVIDIA to introduce level-4 enabling system by 2018

First autonomous Toyota to be available in 2020

Volkswagen

Volkswagen expects first self driving cars on the market by 2019

Audi

Audi to introduce a self-driving car by 2020

TESLA MOTORS

Elon Musk now expects first fully autonomous Tesla by 2019, approved by 2021

NATIONAL ECONOMIC EDUCATION DELEGATION

40+ Corporations Working On Autonomous Vehicles

ATOYOT

WAYMO

HONDA

Audi

NATIONAL ECONOMIC EDUCATION DELEGATION

WHEN?

What is possible?

- **By 2025 (?)**
- **Potentially 95% of VMT by 2035.**
 - Last 5% may be very difficult to achieve.
- **Is this possible?**
 - Horses to cars: 10 years – early 1900s
 - But adoption of EVs is so slow!
 - Adoption of AVs will be rapid.

NATIONAL ECONOMIC
EDUCATION DELEGATION

11

Waymo's self-driving cars are now available on Lyft's app in Phoenix

Hyundai plans to launch a free robot taxi service in California

Singapore's self-driving cars can now be hailed with a smartphone

NuTonomy joins forces with 'the Uber of Southeast Asia'

Cruise to offer free robo-taxi rides in S.F. for the public — without backup drivers

NATIONAL ECONOMIC
EDUCATION DELEGATION

13

13

Trucking – Highly Fertile Ground

- **Long haul trucking is likely the first place we will see it adopted.**
 - Reduces costs associated with drivers.
 - End run around limits on hours of driving.
- **Where does it stand?**
 - Lots of trials underway.
 - TuSimple – actively building a long haul network.
 - Waymo – focused more on last mile/local delivery.

 NATIONAL ECONOMIC EDUCATION DELEGATION

14

14

TuSimple Current and Future Routes (Level 4)

44 states
allow autonomous semi-truck testing

26 states
allow autonomous semi-truck commercial deployment

50 states
cohesive AV operations framework laid out in US DOT 4.0 AV Regulations

AFN Network Expansion PlansTM

- Current Routes
- Future Expansion Plans

Regulatory Landscape

- L4 Autonomous Commercial Operations
- L4 Autonomous Testing
- In Progress

15

What will the future look like?

16

This:

 NATIONAL ECONOMIC
EDUCATION DELEGATION

17

But, will it be:

 NATIONAL ECONOMIC
EDUCATION DELEGATION

18

Hell

- **Primarily individual private car ownership**
 - Much as today.
- **Internal combustion engines**
- **Why Hell?**
 - Dramatically increased VMT and pollution.
 - Potentially increased congestion.
 - Parking

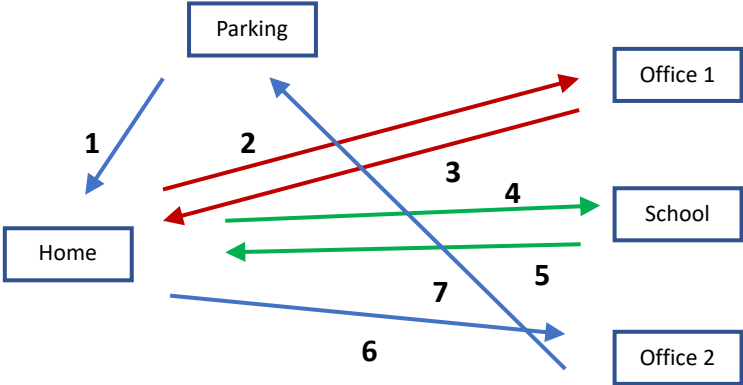

NATIONAL ECONOMIC EDUCATION DELEGATION

19

Two Adults and a Child: Morning Miles

And this is just the morning.....

NATIONAL ECONOMIC EDUCATION DELEGATION

20

Heaven

- **Vehicle ownership will be very limited**
 - Private ownership for those with specialized vehicle needs.
 - Fleet ownership will serve everybody else.
- **Engines: electric**
- **Insurance: product liability**
- **Not clear when we will get there, but this is the likely model.**
 - 2030 for widespread adoption in many regions.

NATIONAL ECONOMIC
EDUCATION DELEGATION

21

Why is this Heaven?

- **Not only autonomous, but:**
 - Shared
 - Connected
 - Green
- **Far fewer cars in existence.**
 - Better resource utilization.
- **VMT could go up or down, but more productive than in Hell.**
- **Congestion effects – unclear, but likely reduced.**
 - Right-sized vehicles, platooning, sharing, V2V communication
- **Minimal need for parking.**

NATIONAL ECONOMIC
EDUCATION DELEGATION

22

Economics Drives Transition: Private

- **Adoption dividend for private individuals**

- Eliminate car ownership
 - Ave annual cost of owning a car: \$9,666 (2021)
 - Cost per mile will fall: \$0.64 to \$0.19
- Repurpose your garage
 - \$50,000 from transition to bedroom

Average Costs Per Mile

Miles per Year	10k	15k	20k
Average Cost	82¢	64¢	55¢

- **Time recovery**

- 50% of the Bay Area workforce has a commute in excess of 30 minutes.

Economics Drives Transition: Public

- **Economic and social costs associated with human drivers are enormous:**

- ACCIDENTS:
 - Drive 25% of congestion.
 - Result in 40,000 deaths.
 - And 2 million injuries.
 - 90+% caused by human error.
- Increased productivity from not driving.
- Costs of human drivers estimated at up to \$1.3 TRillion each year

25

Encourage Change

- **Mobility and equity considerations**
 - Elderly/disabled/impooverished
- **Safety:** only way to reduce traffic fatalities is by coordinated effort
- **Productivity:** reduced congestion
- **Environment:** speed transition to electric vehicles

These are all societal benefits that come about too slowly if the private market is left to itself.

NATIONAL ECONOMIC EDUCATION DELEGATION

26

Environment

 NATIONAL ECONOMIC EDUCATION DELEGATION

27

Environmental Implications Depends: Heaven or Hell

- **Improved resource utilization**
- **More efficient travel**
 - Right sized vehicles
 - Optimized routes
 - Reduced congestion
 - No searching for parking
- **Increased VMT**
- **Cleaner technologies**
 - Electric
 - Lighter vehicles
- **Energy use of onboard electronics**
 - Weight and functional
- **Increased urban sprawl**

Bottom line: push governments at all levels to embrace and to implement policies deterring private vehicle ownership and zero passenger miles

 NATIONAL ECONOMIC EDUCATION DELEGATION

28

What Changes Will This Bring?

- Disposable income
- Government finances
- Transportation demand
- Infrastructure
- Housing
- Public transportation
- Employment
- Parking

Potentially dramatic improvements in infrastructure planning and maintenance -
Data sharing and integration

NATIONAL ECONOMIC
EDUCATION DELEGATION

29

Public Transportation

- **Ambiguous implications for public transportation**
- **Demand may:**
 - Shrink because of low cost of TaaS
 - Grow because last mile problem is solved
- **Extensions may be added through contract with TaaS company**

NATIONAL ECONOMIC
EDUCATION DELEGATION

30

Employment

- **Massive job displacement/relocation (Millions!):**
 - Drivers of all varieties: truck, taxi, delivery...
 - Car production jobs, car parts production jobs
 - Gas station, vehicle repair, and body shop
 - Police and fire
 - Health care workers
 - And so on...

NATIONAL ECONOMIC
EDUCATION DELEGATION

31

Parking

- **Greatly reduced demand for parking lots.**
- **Service providers will own parking lots in strategic places.**
- **Street parking will largely be a thing of the past.**
 - More green space in cities
- **Shopping mall and apartment parking?**
 - Converted to housing?

NATIONAL ECONOMIC
EDUCATION DELEGATION

32

Freeing Up Urban Space from Parking

- **Los Angeles: 14% of incorporated land area**
 - 200 Square miles
- **San Francisco: 275,450 on-street parking spaces**
 - Enough to parallel-park a line of cars 60 miles longer than California's entire 840-mile coastline
- **Nationwide: (estimate) 500 million spaces**
 - That's larger than Delaware and Rhode Island combined.
 - Could be as many as 2 billion (add in Connecticut and Vermont).

33

Summary of Change

- **Massive employment upheaval.**
- **Local government finances will look very different.**
- **Housing will be easier to build and more plentiful.**
- **Parking conversions will be commonplace.**
- **Demand for transportation infrastructure will likely decline.**
 - Transportation infrastructure technology will be a booming business.
- **Demand for public transportation may well decline.**
- **Coming likely sooner rather than later!**

34

Potential Problems and Concerns

- Expansion of the electric grid to provide sufficient capacity.
- Mining for rare earth minerals for batteries.
- Hacking of autonomous vehicles for nefarious purposes.
- Competition in service provision in some markets.
- And many more...

35

Investment Opportunities

- Parking lots/garages
- Transportation technology
- Certain residential properties
- Apartment complexes
- Infrastructure technology

36
