

COVID-19: Economic Implications and Policy Response

Jan. 25, 2020
League of Women Voters, Ogden, UT

Doris Geide-Stevenson, Ph.D.
Professor of Economics
Weber State University, Ogden, UT

NATIONAL ECONOMIC
EDUCATION DELEGATION

1

1

Who Are We?

- **Honorary Board: 47 members**

- 2 Fed Chairs: Janet Yellen, Ben Bernanke
- 6 Chairs Council of Economic Advisers
 - o Furman (D), Rosen (R), Bernanke (R), Yellen (D), Tyson (D), Goolsbee (D)
- 3 Nobel Prize Winners
 - o Akerlof, Smith, Maskin

- **Delegates: 500+ members**

- At all levels of academia and some in government service
- All have a Ph.D. in economics
- Crowdsource slide decks
- Give presentations

- **Global Partners: 45 Ph.D. Economists**

- Aid in slide deck development

NATIONAL ECONOMIC
EDUCATION DELEGATION

2

2

Available NEED Topics Include:

- US Economy
- Climate Change
- Economic Inequality
- Economic Mobility
- US Social Policy
- Trade and Globalization
- Trade Wars
- Immigration Economics
- Housing Policy
- Federal Budgets
- Federal Debt
- 2017 Tax Law
- Autonomous Vehicles

3

Credits and Disclaimer

- **This slide deck was authored by:**
 - Scott L. Baier, Clemson University
 - Jon D. Haveman, NEED
 - Geoffrey Woglom, Amherst College
 - Doris Geide-Stevenson, Weber State University
- **Disclaimer**
 - NEED presentations are designed to be nonpartisan.
 - It is, however, inevitable that the presenter will be asked for and will provide their own views.
 - Such views are those of the presenter and not necessarily those of the National Economic Education Delegation (NEED).

4

Resources

- **Schedules of Major Economic Releases**

- Economic Calendars at
 - o [Marketwatch](http://marketwatch.com/economy-politics/calendar) (marketwatch.com/economy-politics/calendar)
 - o [FRBNY](http://newyorkfed.org/research/calendars/nationalecon_cal) (newyorkfed.org/research/calendars/nationalecon_cal)

- **DIY Real Time Data:**

- [Track the Recovery](http://tracktherecovery.org): (tracktherecovery.org)
- [Federal Reserve Economic Database \(FRED\)](http://fred.stlouisfed.org): (fred.stlouisfed.org)

- **Data Visualization and Coverage**

- Some examples at [Tableau](http://tableau.com)

5

Outline

- **What is the current state of “the economy”?**
- **What have been the effects of policy?**
- **What are the risks to recovery?**
- **Is progress equitable?**

6

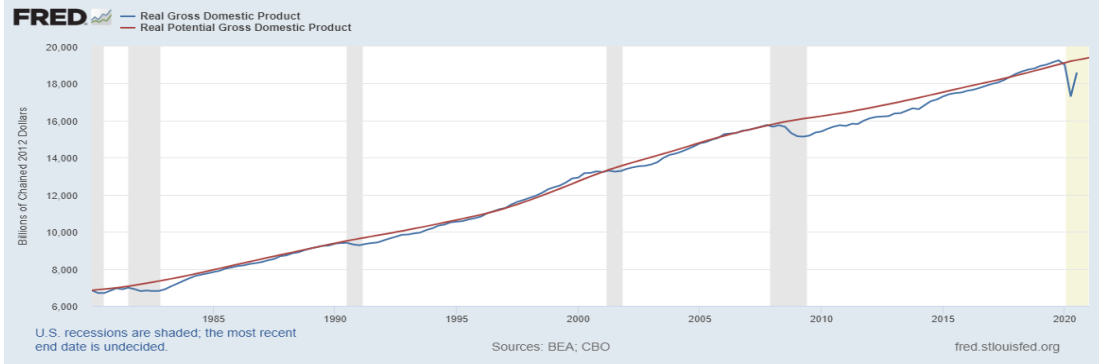

Spending Collapsed in March

Implications of Reduced Spending

Where are We

Real GDP = Total value of production = Consumption + Investment + Government Purchases + Net Exports

9

Where are we?

As of January: Looks "V" shaped to me! Could it become a W or K shaped recovery?

10

Where are we now?

Executive Summary

- Household spending on goods is largely recovered (+), but spending on services remains far below pre-pandemic levels (-)
- Cash injections from government have increased household personal income (+)
- Interest rates are at historic lows (+/-)
- About 1/3 of small businesses have stopped operations (-)
- Unemployment rolls have remained significantly elevated (-)
- Many Americans – especially women - have left the labor force (-)

NATIONAL ECONOMIC EDUCATION DELEGATION

A Tale of Three Policies Efforts

- Social policy: Social Distancing
- Monetary Policy
- Fiscal Policy

13

Public Health versus the Economy? Lives versus Livelihood?

Necessary precautions

United States, 1918 flu mortality and the growth in manufacturing employment
By city and intervention*

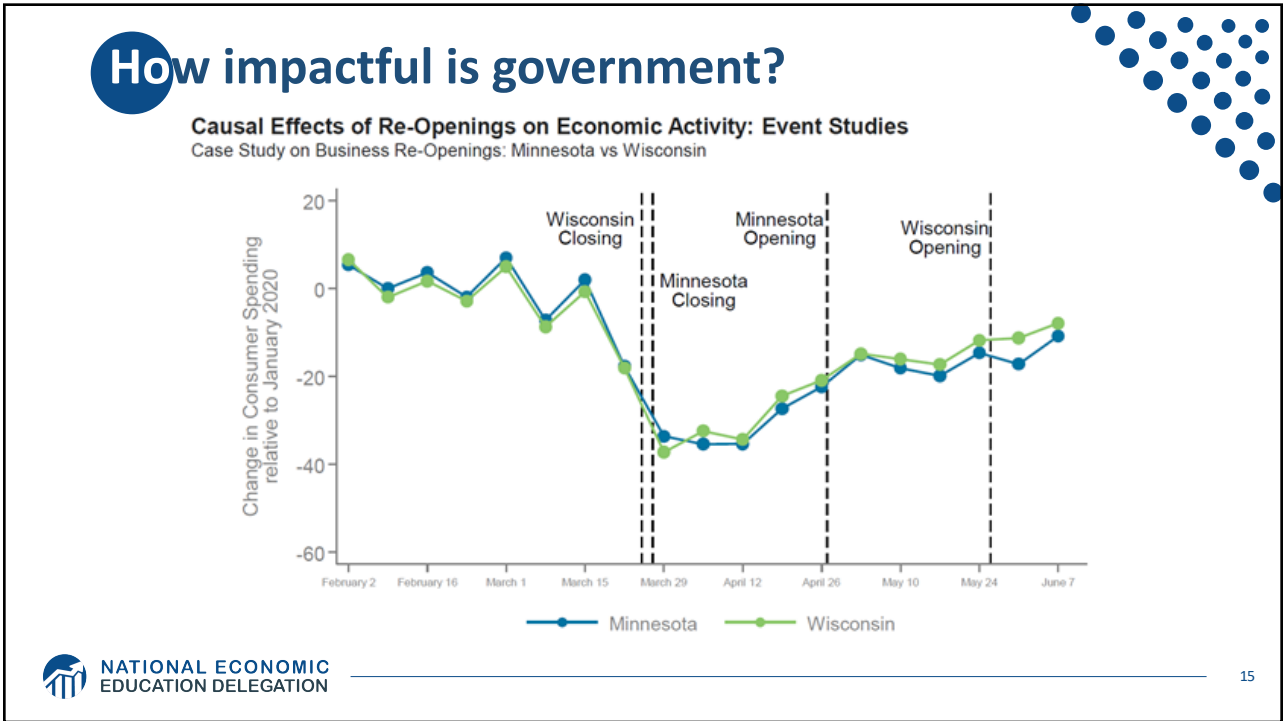

Source: "Pandemics depress the economy, public health interventions do not: evidence from the 1918 flu" by S. Correia, S. Luck and E. Verner, 2020

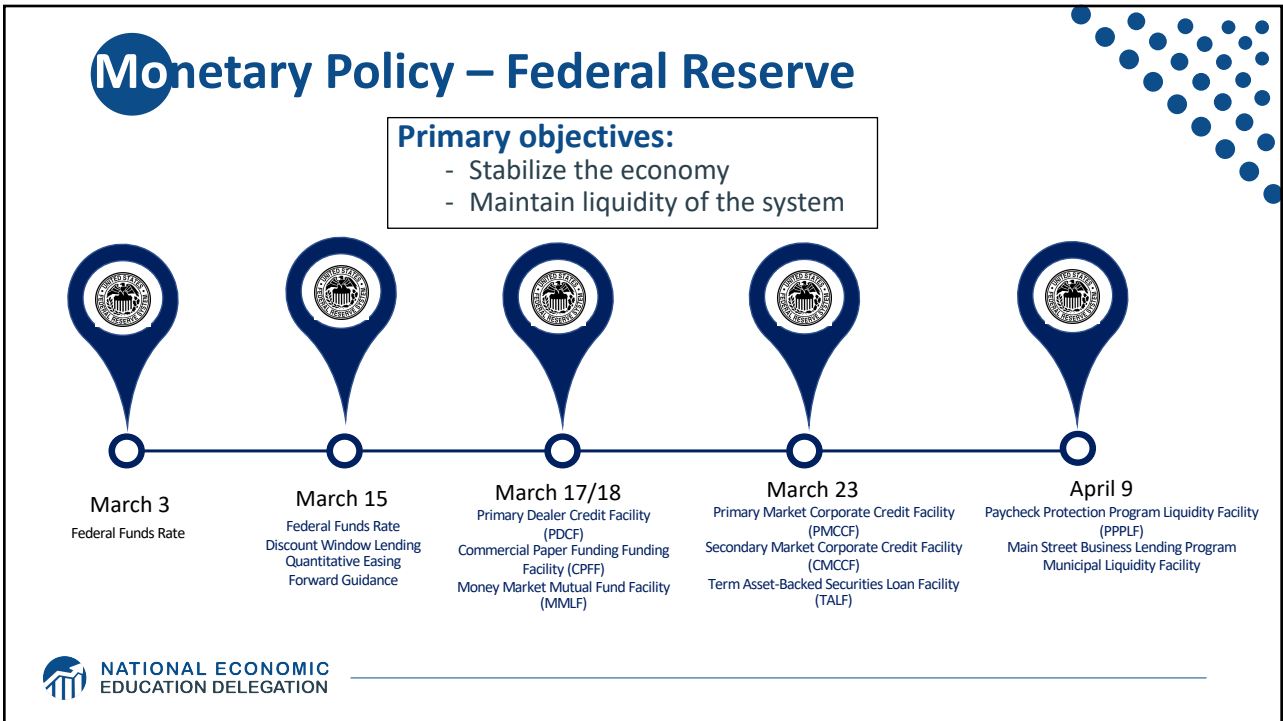

*Non-pharmaceutical measures, e.g. social distancing, closing schools and churches, mandatory face masks

The Economist

14

15

16

Federal Funds Rate and Balance Sheet

17

Monetary Policy – Current State and Impact

- **Fed Funds Rate at 0%** → newly issued debt very cheap
 - Good for borrowers
- **Balance Sheet grew from \$4T to \$7T**
 - Large volume of liquidity + few high yield, high quality savings vehicles → risky asset price bubbles
- **Forward Guidance: Keep FFR at ZLB until PCE inflation “at least 2%”**
 - High inflation + low nominal rates → negative real returns
 - Difficult period for fixed-income households

Monetary Policy acted quickly and effectively to prevent a financial market meltdown and keep credit flowing. But the Fed lends and does not spend; so there is a limited impact on spending.

18

PPP Loans Didn't Go to the Right Firms

The distribution of PPP loans has not matched levels of unemployment

SOURCES: U.S. Small Business Services Administration, Paycheck Protection Program (PPP) Report, Approvals through 07/24/20, July 2020; and S&P Global Ratings, Economic Research: The Paycheck Protection Program Impact on Jobs: (More) Help Wanted, May 2020.
© 2020 Peter G. Peterson Foundation PGPF.ORG

In addition, first round loans went disproportionately to predominantly white Congressional Districts
Bloomberg, 7/30

Improvements to the program in the second stimulus bill

NATIONAL ECONOMIC EDUCATION DELEGATION

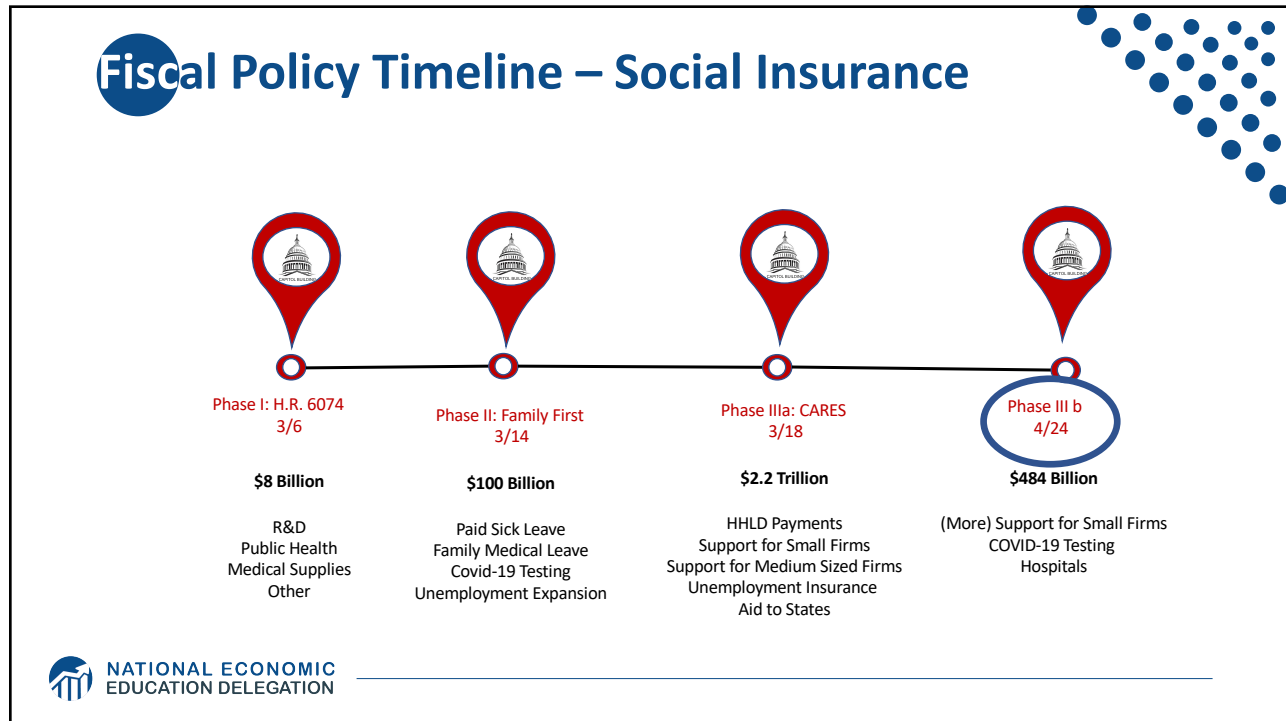

Did PPP Mitigate Job Losses?

Key Takeaway:

PPP had a relatively small impact on small business payroll (but it did help!)

NATIONAL ECONOMIC EDUCATION DELEGATION

21

Fiscal Policy: This Shock is Different

- **Classical response: Stimulate the economy!**
- **This economic shock is different: “health shock”**
 - with large macroeconomic consequences.
- **Response should be:**
 - target the cause of the problem
 - provide financial support for individuals and for firms.
- **When the health crisis is under control -> classical stimulus.**

 NATIONAL ECONOMIC EDUCATION DELEGATION 22

22

What Have Been the Fiscal Policy Effects

- **Fiscal policy acted quickly, but inevitably made some mistakes.**
 - Stimulus Checks, (\$268b)
 - Expanded Unemployment, (\$268b)
 - Paycheck Protection Program, (\$525b)

Big Caveat: Much of the Fiscal Stimulus ended in July and there was no new stimulus program until late December 2020 with another 3rd stimulus (\$1.9Trillion) proposed by the Biden administration.

Real Disposable Income – Income after taxes and transfers

Personal Savings Rate

Rebound in Consumption Faster than Expected

- As Consumption goes so goes the economy (C is 2/3 of GDP),
Growth Rates:
- GDP: 2019Q4, **2.4%**; 2020Q1, **-5.1%**; 2020Q2, **-31.7%**; 2020Q3, **+33.1%**
- CON: 2019Q4, **1.6%**; 2020Q1, **-6.9%**; 2020Q2, **-34.1%**; 2020Q3, **40.7%**

27

28

What is the shape of the recovery?

1. **Aggregate Data look good because of the CARES Act (at least until the end of September = Q32020)**
2. **But, it doesn't look good everywhere.**
 1. Small firms.
 2. Restaurants and entertainment
 3. Low Income workers
 4. Women

29

A "K-shaped" recovery?

Executive Summary

- Those with financial wealth/residential real estate have seen its value grow in excess of inflation
- High income earners (>60k/yr) have largely kept their jobs; middle and low income earners have depressed employment rates
- Women are disproportionately exiting labor force
- Food insecurity at an all time high

30

Employment at Small Firms (40% of total jobs)

Between February and April 2020, net loss of 10.4m losses, by Dec. 2020 'only' 4.4m jobs lost.

31

Hard Hit Sectors

32

4. State and Local Budgets

FIGURE 1

COVID-19 State Budget Shortfalls Could Be Largest on Record

Total state budget shortfall in each fiscal year, in billions of 2020 dollars

* Estimated based on CBPP calculations

Source: Pre 2014: CBPP survey; 2020 and following: CBPP calculations

CENTER ON BUDGET AND POLICY PRIORITIES | CBPP.ORG

NATIONAL ECONOMIC
EDUCATION DELEGATION

33

33

Causes for Optimism

- **There were no short-run macro problems at the start of the crisis**
 - The only obstacle to a quick recovery is damage that is being done while the pandemic continues (and the pandemic itself)
 - Main concern: temporary disruptions turning into permanent ones
- **Things are not as bad as they could be**
 - Federal Reserve prevented collapse in financial markets
 - Congress + White House prevented complete collapse in labor/productive markets; second and third rounds of stimulus will help
 - Aggregate household balance sheets in good position
- **Vaccine rollout should alleviate pressure on service industry**

NATIONAL ECONOMIC
EDUCATION DELEGATION

34

34

What are the risks to recovery?

1. Continuation of the virus (like 1918)
2. Lack of additional fiscal support to prevent debt default, evictions, and business failures (like 1929)
3. Damage to State and Local Budgets leading to cuts in job and discretionary spending (like 2009)

Key Risk #1: *Temporary economic downturn becoming permanent*

Key Risk #2: *An inequitable recovery*

NATIONAL ECONOMIC
EDUCATION DELEGATION

35

35

Causes for Concern

- **Economic inequality is worsening**
 - Elevated/persistent unemployment + rising asset prices
 - Does not show up in aggregate data (problem of “averages”)
- **State/local governments face deep budget shortfalls**
 - Often the largest employers within a state
- **Eviction/foreclosure moratoria are shifting burdens to future**

NATIONAL ECONOMIC
EDUCATION DELEGATION

36

36

Gains by American Billionaires

WEALTH OF U.S. BILLIONAIRES GROWS \$1.06 TRILLION (36%) IN 9 MONTHS

37

Thoughts on Policies to Date

- Costs are enormous, but we were doing the right things!
- Health/Social Policies to address the Pandemic: F grade
- Monetary policy: A grade
- Fiscal policy grade: C+ grade
 - Direct cash payments
 - o Are they really getting into the hands of those most in need?
 - Corporate or otherwise?
 - Right strategy to maintain employee-employer ties? (Europe – ‘Kurzarbeit’)
 - What about states and local governments?

38

Conclusion

- **COVID-19 is health crisis that has macroeconomic implications.**
 - With enormous built-in inequities.
- **GDP will likely contract between 3.5 and 4.5 percent in 2020.**
 - Positive growth will likely return in 2021
- **Significant structural changes.**
 - Telecommuting, telehealth, retail decline, other business failures.
- **Policy gap and economic reallocations will create hardship.**
 - Hunger, evictions, foreclosures, additional deaths.
- **Long-term effects: Educational opportunities, labor force participation changes, reallocations that require retraining, increasing inequality.**

Thank you!

Did \$1200 checks and \$600 PUC create buffer?

Change in Median Checking Account Balance From January

Note: End of month balances. The analysis only includes the unemployed who received unemployment insurance benefits through direct deposit. Households with multiple checking accounts are added together. Source: JPMorgan Chase Institute

Key Takeaways:

1. \$1200 checks + \$600 PUC allowed households to build cash buffer
2. Expiration of \$600 PUC caused sharp decline in balances of unemployed relative to employed

41

Did \$1200 checks and \$600 PUC induce spending?

Key Takeaways:

1. \$1200 checks + \$600 PUC allowed all households to spend similar to pre-COVID level
2. Expiration of \$600 PUC caused sharp decline in spending for unemployed relative to employed

Weekly Spending

Source: Diana Farrell, Peter Ganong, Fiona Greig, Max Liebeskind, Pascal Noel, Daniel Sullivan, Joseph Vavra, JPMorgan Chase Institute

42

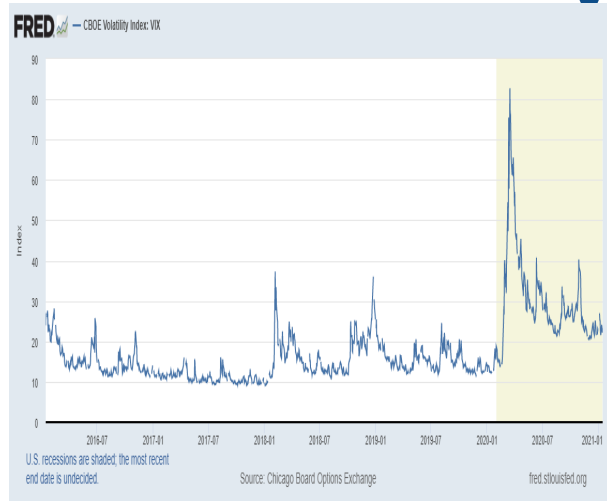

Unemployment Claims (weekly)

Yikes!
Since March 21st 57 million people filed for unemployment

At its peak, 25 million, or an “insured unemployment” rate of 17.1%

Stock Market Impact

Three Measures of Unemployment?

- **None is a perfect measure:**

- Insured Unemployment
 - o Most accurate number because it is a numerical count.
 - o Administrative delays in processing claims and not all unemployed are eligible to collect
- Household Survey: 60,000 households
 - o Disruptions to survey
 - o Ambiguity of some of the classifications
 - o Survey are done mid-month
- Establishment Survey: 145,000 businesses about 700,000 employees
 - o Response rate fluctuated recently
 - o Survey done mid-month

Making Sense of Unemployment Numbers

Two Data Reports:

1. **Department of Labor *Unemployment Insurance Weekly Claims***

1. Weekly, Thursdays at 8:30
2. Initial Claims
3. Continuing Claims or Insured Unemployment

2. **Bureau of Labor Statistics (BLS), *Employment Situation***

1. Monthly, First Fridays at 8:30. Surveys done midmonth
2. Household Survey: Unemployment Rate
3. Establishment Survey: New Jobs Created

For Perspective on Numbers, as of 2/2020:

Labor Force, 165m; Employed; 159m; Unemployed, 6m, or 3.5%

Total New Jobs added per month: round 225 thousand

Record Levels of Debt are Forecast

47

From a Republican Deficit Hawk

- “I’m a fiscal hawk from way back, and all of my heebie-jeebies are going off when I see these numbers,” said Douglas Holtz-Eakin, a Republican who used to head the Congressional Budget Office and is president of American Action Forum. “But then I look at the scale of the problem, and I think, yeah, that’s that. Gotta do it.” *Politico*, 4/29

48
