# Outline

- Quick Review of where the recovery stands.
- 3 Related economic puzzles all related to the persistence of inflation and the future of the recovery.
- Why are all eyes on the Fed next Wednesday.

## Three Related Puzzles

1. How long will Supply Chain Bottlenecks persist?
2. Is there a Labor Shortage?
3. Will the increase In Inflation persist?

13

## 1. Supply Chain Bottlenecks

- **Transportation Issues:**
  - Shortage of port workers.
  - Minnesota Trucking Association estimates 60,000 person shortage of truck drivers (*The Atlantic*, 10/7/21).
- **But, also an increase in demand for goods relative to services.**

# Overall, Producer Prices are Still Rising

17

# 2. Crazy Labor Market

18

## Explanations of Labor Shortage

1. Too generous unemployment benefits.
2. Covid Fears and Family responsibilities.
3. Mismatch of available workers and jobs.

This Friday we get a reading on employment and unemployment from the BLS

## Whatever the Reason: Labor Costs Are Rising

### 3. Democratic Economists Disagree

**Former Treasury Secretary Larry Summers, 10/13/2021:**

**“We’re in more danger than we’ve been during my career of losing control of inflation in the U.S.,” the 66-year-old Summers,..., said.**

**Current Treasury Secretary Janet Yellen, 10/24/2021:**

**“I don’t think we’re about to lose control of inflation,” Yellen said, “Americans haven’t seen inflation like we have experienced recently in a long time. But as we get back to normal, expect that to end.”**

**Yellen in the Spring, 3/14**

**“We have had very well anchored inflationary expectations, and a Federal Reserve that’s learned how to manage inflation.”**

### Have We Lost Our Anchor?

## So, What's the Problem?

If the Fed sees persistent inflation, can't they just raise interest rates?

- **Economic Problems**

1. Total Spending has tremendous inertia, it could take months for a rise in interest rates to slow spending;
2. Significant danger of "overshooting." What would a substantial rise in interest rates do to stock prices, financial stability, Federal deficit?

- **Political Economic Problem**

1. Would the Fed raise rates with the 2022 elections pending?
2. A substantial rise in rates would make our deficit and debt problems much, much worse.
