

Osher Lifelong Learning Institute, Winter 2022 **Contemporary Economic Policy**

Oklahoma State University
March 1, 2022

Roger White, Ph.D.
Whittier College

1

Available NEED Topics Include:

- Coronavirus Economics
- US Economy
- Climate Change
- Economic Inequality
- Economic Mobility
- Trade and Globalization
- Minimum Wages
- Immigration Economics
- Housing Policy
- Federal Budgets
- Federal Debt
- Black-White Wealth Gap
- Autonomous Vehicles
- US Social Policy

2

Course Outline

- **Contemporary Economic Policy**

- Week 2 (2/15): US Economy & Coronavirus Economics
- Week 3 (2/22): Climate Change Economics (Simone Wegge, CUNY)
- **Week 4 (3/1): Immigration Economics (Roger White, Whittier College)**
- Week 5 (3/8): Infrastructure Economics (Mallika Pung, Univ. of New Mexico)
- Week 6 (3/15): Trade and Globalization (Alan Deardorff, Univ. of Michigan)
- Week 7 (3/22): The Black-White Wealth Gap (Jon Haveman, NEED)

3

Submitting Questions

- **Please submit questions in the chat.**

- I will try to handle them as they come up, but I may take them in a bunch as time permits.

- **We will do a verbal Q&A once the material has been presented.**

- And the questions in the chat have been addressed.

4

What Is Immigration?

- **Immigration**
 - The action of coming to live in another country.

- **Emigration**
 - The act of leaving one's own country and going to live in another country.

7

Why Do People Migrate?

- **Push factors:**
 - Economic dislocation, violence, population pressures, religious persecution, or denial of political rights.

- **Pull factors:**
 - Potential for higher wages, job opportunities, and political or religious liberty.

- **Uneven development:**
 - Disparities in income, standards of living, and the availability of jobs within and across societies.

8

History of US Immigration

Source Countries	Pre-1790	Source Countries	1790-1820
African countries*	300,000	African countries*	85,000
England	300,000	Scotland-Ireland	50,000
Scotland-Ireland	100,000	England	45,000
Germany	100,000	France	40,000
Scotland	75,000	Germany	25,000

* Slave trade and clearly not voluntary or reflective of standard motivations for immigration.

History of US Immigration

Source Countries	1820-1880
Germany	3,000,000
Ireland	2,800,000
Britain	2,000,000
Austro-Hungarian empire	1,000,000
Canada	750,000
China	230,000
African countries	50,000

History of US Immigration

Source Countries	1880-1930
Italy	4,600,000
Austro-Hungarian empire	4,000,000
Russian empire	3,300,000
German empire	2,800,000

27

Why Do We Care? Economic Implications

- GDP
- Labor markets
- Government revenue and spending
- Exports and FDI
- Crime

NATIONAL ECONOMIC
EDUCATION DELEGATION

28

28

GDP and Labor Markets

29

Two Sets of Implications

- **Aggregate effects: The size of the pie**
- **Income distribution: The size of slices of the pie**

30

GDP: How Does This Work?

- **What determines the size of an economy?**
 - Technology/productivity
 - Physical capital
 - The number of workers
 - Immigration adds to the number of workers.
- **Number of immigrants in the labor force is high**
 - 28.2 million foreign-born persons ages 16+ in the labor force in 2018.
 - 17.4% of the total US workforce.
- **Evidence**
 - Immigrants added 11% to GDP (\$2 trillion) in 2016.

31

Labor Market Implications: Complicated

- **Depends on the type of immigrant: Skills/education**
 - Similar to native-born population?
 - Low-skilled?
 - Highly skilled?
- **Brings capital market implications**
 - Low-skilled – capital supplementing
 - Highly skilled – capital complementing

32

Labor Market Implications

- **Provides net benefits to the receiving economy**
 - Larger labor supply.
 - Changes in labor prices increase production of goods and services that use the type of labor offered by immigrants.
- **Short run: there are winners and losers**
 - Changes in wage structure and returns to capital affect native-born workers differently.
- **Long run: could be no winners, but also no losers**
 - The economy might adjust to pre-immigration wage structure and returns to capital. No change for native-born individuals.

33

Labor Market Implications: Basic Case

- **Suppose the immigrants have the same skills as the native-born population in a city**
 - Short run: ***workers lose and owners of capital win***
 - Higher ratio of labor to capital.
 - Wages decline, and the returns to capital rise.
 - Long run: ***there are no losers or winners***
 - Capital flows into the city
 - Because the returns are now higher here than elsewhere
 - The original ratio of labor to capital is restored.

34

Labor Market Implications: Low-Skill Immigrants

- **Suppose the immigrants are less skilled than the native-born population in a city**
 - Short run: *low-skilled* workers are losers
 - Supply of low-skilled workers goes up, so their wages go down.
 - Long run: there need not be any losers, but there may still be
 - Prices adjust
 - Purchasing power of low-skilled workers need not be lower.
 - **Subtlety:** Opportunities for low-skilled native-born workers expand as the economy expands.
 - Greater demand for English-proficient workers.

35

Labor Market Implications: General Principles

- **Short run**
 - Harm likely to native-born workers who are similar to immigrants.
 - Benefit likely for other workers and owners of capital.
- **Long run**
 - **Lower prices** will restore some of the purchasing power of those harmed.
 - **Expanded opportunities** may restore wages of harmed native-born workers.
 - Inflows of other types of labor and capital may **return the economy to its pre-immigration wage structure and production patterns.**

36

Pattern of Immigration

Educational Attainment of Recent Immigrants – Last 5 Decades

37

Recent Immigrants Are Less and More Educated

Source: Migration Policy Institute
Authorized immigration between 2013-2017

38

Skilled Immigrants and Innovation

- **1% increase in the share of the immigrant college graduate population**
 - 9-18% increase in patenting per capita
 - Increased immigration increases patenting by native-born population
 - Nonetheless, the effect is positive
- **In the 1990s**
 - Increased skilled immigration can account for one-third of increased patenting in that decade.
 - This translates into a 1.4-2.5% increase in GDP per capita by the end of the decade.

39

Immigrants and Entrepreneurship

Self-Employment Rates by Nativity

40

41

Immigration and Inequality: Summary

- **Beginning in about 1970, the immigrant share of the US population increased dramatically.**
 - 5% in 1970 and 14% in 2016
- **Compared to the native born, immigrants:**
 - Comprise a larger share of less-educated workers (less than HS diploma)
 - Comprise a larger share of highly educated workers (advanced degree)
- **Immigration has likely increased income inequality.**
- **Its effect has likely been small.**
 - ~5% between 1980 and 2000
 - No reason to think it has been bigger since then

NATIONAL ECONOMIC EDUCATION DELEGATION

42

Government Revenues and Expenditures

43

Why Is This Important?

- **Important for understanding whether immigrants will be net contributors to the economy.**
- **Two additional reasons:**
 - Taxpayer inequity geographically
 - Necessary to understand the full consequences of admitting additional immigrants into the country

44

Topics?

- **Basic Question:**

- Taxes (income, sales, and other) immigrants pay vs. government expenditures on public benefits and services they receive.

- **More complicated:**

- Immigrants also affect the fiscal equation for many native-born residents.
 - o Indirectly through labor and capital markets.
 - o Changes in wages and the return to capital.

Age-Specific Taxes and Benefits

What Do We Know?

- **Immigrants who arrive while of working age:**
 - Are, on average, net contributors.
 - 21-year-old with a high school diploma: +\$126,000 over a lifetime
 - Though this value gradually declines with age at arrival.
 - Turns negative for arrivals of age 35+
- **Net contribution crucially depends on characteristics**
 - Age distribution, family composition, health status, fertility patterns
 - Temporary or permanent relocation
 - Employment in the legal labor market
 - Authorized or unauthorized

Bottom Line/Consensus of Estimates

- **Federal level: fiscal impact is generally positive.**
- **State and local level: typically negative fiscal impact.**

Implications for Major Federal Programs

- Documented immigrants are less likely to use Social Security and Medicare.
- Unauthorized immigrants are ineligible.
 - They will pay into the system but cannot receive benefits.
- Medicaid: not available to legal residents for the first five years.
- Provide a source of revenue for an aging population.

The Aging US Population

51

Other Implications of Immigration

NATIONAL ECONOMIC EDUCATION DELEGATION

52

Exports and FDI

- **Flows of goods, services, and investments internationally rely heavily:**
 - Information
 - Contacts abroad
- **Immigrants bring both information and networks.**
- **A variety of studies show that increased immigration from a particular country leads to**
 - Increased exports to that country.
 - Increased flows of investment to that country.
- **Migrant networks do indeed complement both trade and FDI.**

53

Immigrants and Crime Rates

- **Conventional wisdom:**
 - Immigrants commit crimes more frequently than do native-born residents.
 - Rising immigration leads to rising crime.

Let's Have a Look!

EDUCATION DELEGATION

57

Source: Butcher & Piehl (1998b).

57

Immigrants and Crime Rates

- **Conventional wisdom:**

- Immigrants commit crimes more frequently than do native born residents.
- Rising immigration leads to rising crime.

- **What do the data say?**

- Rates of incarceration are lower for the foreign born than US born.
- Neighborhoods with more immigrants have lower crime rates.
- There is no evidence that deporting noncitizen immigrants affects crime rates.

NATIONAL ECONOMIC
EDUCATION DELEGATION

58

58

Summary

- Immigration should be thought of as increasing the population of the United States.
- This brings economic growth and opportunity, just as does increasing the native-born population.
- Including unauthorized immigrants, the supply of low-skilled workers is increased
 - This lowers the wages of low-skilled workers.
 - But also increases labor force participation among highly skilled workers.

At the Same Time....

- **Immigrants are often a select group:**
 - Willing to incur an enormous personal or familial cost to better their lives.
- **As a result:**
 - Immigrants tend to commit crimes at low rates.
 - Immigrants tend to be entrepreneurial and to add significantly to economic growth.
- **Although there are distributional issues:**
 - Immigration is an important contributor to economic growth.
 - Immigration helps to sustain vital government programs.

About Conventional Wisdom

- **Native-born unskilled workers**
 - There is some negative impact on their wages.
 - But who wins and loses depend on the skill mix of immigrants;
 - when this skill mix changes, so do its effects.
- **Crime**
 - Immigrants, both authorized and unauthorized, commit crimes at much lower rates than do native-born residents.
- **Government programs**
 - Federal: immigrants are a source of revenue and stability for some important programs.
 - State and local: because education is funded at the local level, this can be a drain on local government coffers.
