Driving Change – Autonomous Vehicles' Big Impact

National Economic Education Delegation

Jon Haveman, Ph.D.

June 3, 2020

NATIONAL ECONOMIC
EDUCATION DELEGATION

1

National Economic Education Delegation

- **Vision**

- One day, the public discussion of policy issues will be grounded in an accurate perception of the underlying economic principles and data.

- **Mission**

- NEED unites the skills and knowledge of a vast network of professional economists to promote understanding of the economics of policy issues in the United States.

- **NEED Presentations**

- Are **nonpartisan** and intended to reflect the consensus of the economics profession.

NATIONAL ECONOMIC
EDUCATION DELEGATION

2

2

Who Are We?

- **Honorary Board: 48 members**

- 2 Fed Chairs: Janet Yellen, Ben Bernanke
- 6 Chairs Council of Economic Advisers
 - Furman (D), Rosen (R), Bernanke (R), Yellen (D), Tyson (D), Goolsbee (D)
- 3 Nobel Prize Winners
 - Akerlof, Smith, Maskin

- **Delegates: 500+ members**

- At all levels of academia and some in government service
- All have a Ph.D. in economics
- Crowdsource slide decks
- Give presentations

- **Global Partners: 45 Ph.D. Economists**

- Aid in slide deck development

Credits and Disclaimer

- **This slide deck was authored by:**

- Jon Haveman, NEED

- **This slide deck was reviewed by:**

- Ronald Fisher, Michigan State University
- William F. Fox, University of Tennessee, Knoxville

- **Disclaimer**

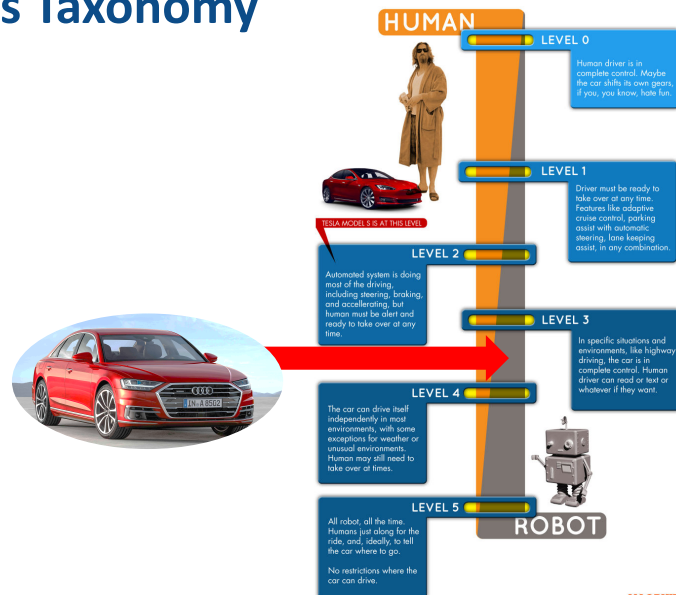

- NEED presentations are designed to be nonpartisan.
- It is, however, inevitable that the presenter will be asked for and will provide their own views.
- Such views are those of the presenter and not necessarily those of the National Economic Education Delegation (NEED).

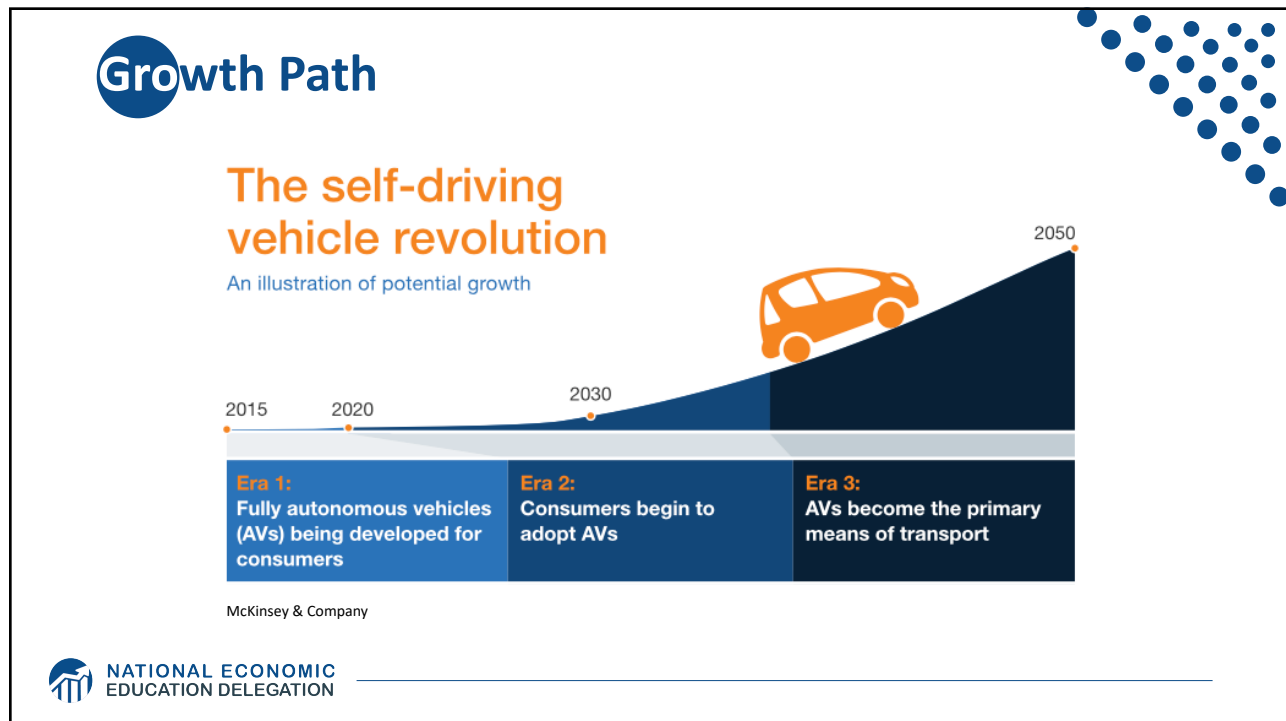

Outline

- Where does the AV path lead?
- Transition
- Policy/Planning Issues
- Major Economic/Development Changes

Autonomous Taxonomy

SAE AUTONOMY LEVELS

7

McKinsey isn't Always Spot On

- "In 1980, McKinsey & Company was commissioned by AT&T to forecast cell phone penetration in the U.S. by 2000.
 - The consultant's prediction, 900,000 subscribers,
 - was less than 1% of the actual figure, 109 Million."
 - Professor Angel Lozano, 2014

NATIONAL ECONOMIC EDUCATION DELEGATION

8

Two Important Questions:

1. When will Transportation as a Service (TaaS) be available?
2. How quick will the transition be?

WHEN? What do the headlines say?

NVIDIA to introduce level-4
enabling system by 2018

First autonomous Toyota
to be available in 2020

Volkswagen

Volkswagen expects first
self driving cars on the
market by 2019

Audi

Audi to introduce a self-
driving car by 2020

TESLA MOTORS

Elon Musk now expects
first fully autonomous
Tesla by 2019, approved by
2021

Wildly Optimistic, But...

40+ Corporations Working On Autonomous Vehicles

WAYMO

NATIONAL ECONOMIC
EDUCATION DELEGATION

11

11

WHEN?

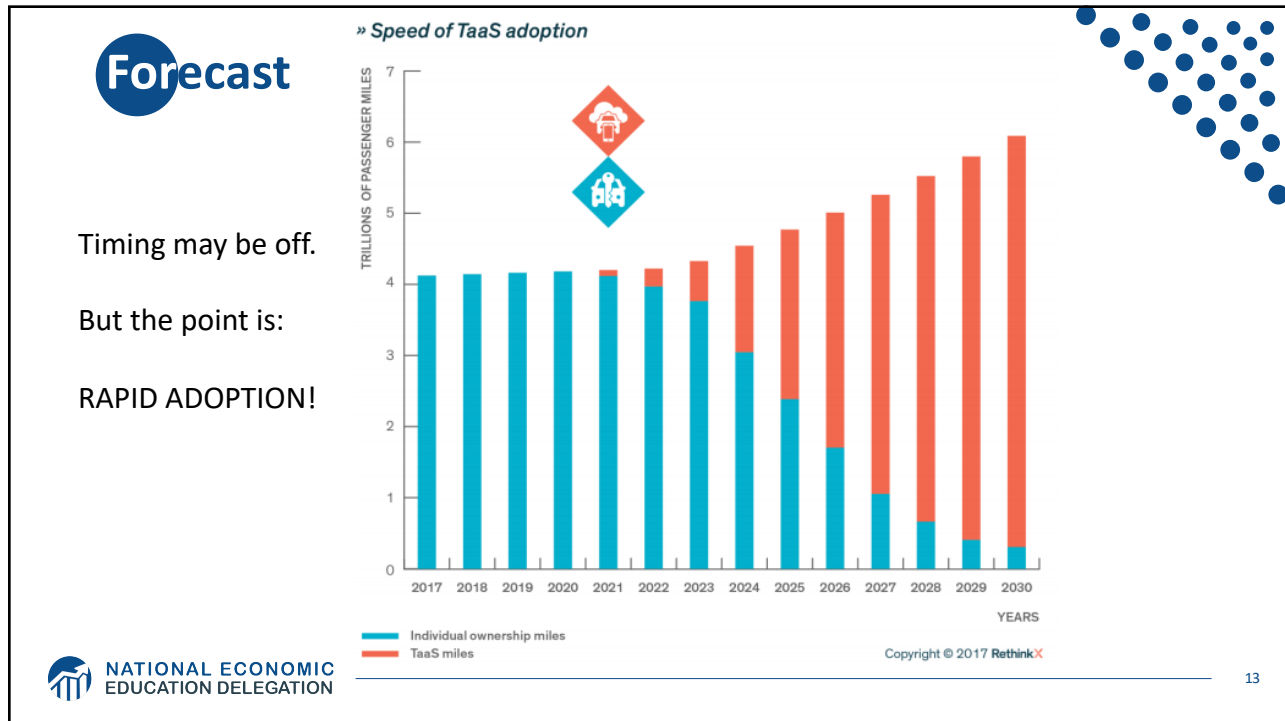

What is possible?

- By 2025
- Potentially 95% of VMT by 2035.
- Last 5% is going to be very difficult to achieve.
- Is this possible?
 - Horses to cars: 10 years – early 1900s
 - But adoption of EVs is so slow!
 - Adoption of AVs will be rapid.

NATIONAL ECONOMIC
EDUCATION DELEGATION

12

13

What will the future look like?

NATIONAL ECONOMIC EDUCATION DELEGATION

14

This:

 NATIONAL ECONOMIC
EDUCATION DELEGATION

15

But, will it be:

 NATIONAL ECONOMIC
EDUCATION DELEGATION

16

Hell

- **Primarily individual private car ownership**
 - Much as today
- **Combustion engines**
- **Why Hell?**
 - Dramatically increased VMT and pollution
 - Potentially increased congestion
 - Parking

NATIONAL ECONOMIC
EDUCATION DELEGATION

17

Two Adults and a Child: Morning Miles

And this is just the morning.....

NATIONAL ECONOMIC
EDUCATION DELEGATION

18

18

Heaven

- **Vehicle ownership will be very limited**
 - Private ownership for those with specialized vehicle needs.
 - Fleet ownership will serve everybody else.
- **Engines: electric**
- **Insurance: product liability**
- **Not clear when we will get there, but this is the likely model.**
 - 2030 for widespread adoption in many regions.

NATIONAL ECONOMIC
EDUCATION DELEGATION

19

Why is this Heaven?

- **Not only autonomous, but:**
 - Shared
 - Connected
 - Green
- **Far fewer cars in existence.**
 - Better resource utilization.
- **VMT could go up or down, but more productive than in Hell.**
- **Congestion effects – unclear, but likely reduced.**
 - Right-sized vehicles, platooning, sharing, V2V communication
- **Minimal need for parking.**

NATIONAL ECONOMIC
EDUCATION DELEGATION

20

Economics Drives Transition: Private

- **Adoption dividend for private individuals**
 - Eliminate car ownership
 - Ave annual cost of owning a car: \$9,282
 - Cost per mile will fall: \$0.59 to \$0.19
 - Repurpose your garage
 - \$50,000 from transition to bedroom
- **Time recovery**
 - 50% of Bay Area workforce has a commute in excess of 30 minutes
- **It will become too annoying to drive around all of those autonomous vehicles!**

NATIONAL ECONOMIC
EDUCATION DELEGATION

21

Economics Drives Transition: Public

- **Economic and social costs associated with human drivers are enormous:**
 - ACCIDENTS:
 - Drive 25% of congestion
 - Result in 40,000 deaths
 - And 2 million injuries
 - 90+% caused by human error
 - Costs of human drivers estimated at up to \$1.3 TRillion each year

NATIONAL ECONOMIC
EDUCATION DELEGATION

22

Public Policy/Planning Issues

- **Government buy-in:**
 - Essential – gov't must encourage progress
 - Difficult – because of displacement issue
- **Important transitional issues:**
 - What infrastructure should be developed?
 - What to do about public transportation?
 - What to do with all of the parking spaces?

NATIONAL ECONOMIC
EDUCATION DELEGATION

23

Planning

- **Respond to the coming changes**
 - The planning horizon for any investment in transportation infrastructure based on today's predominant technology has changed.
 - It may have gotten **MUCH shorter**.
- **Encourage the changes to happen more quickly**
 - Mobility, safety, productivity, and environmental benefits abound.

NATIONAL ECONOMIC
EDUCATION DELEGATION

24

Encourage Change

- **Mobility and equity considerations**
 - Elderly/disabled/impooverished
- **Safety:** only way to reduce traffic fatalities is by coordinated effort
- **Productivity:** reduced congestion
- **Environment:** speed transition to electric vehicles

These are all societal benefits that come about too slowly if the private market is left to itself.

NATIONAL ECONOMIC
EDUCATION DELEGATION

25

Environment

NATIONAL ECONOMIC
EDUCATION DELEGATION

26

Interim Summary

- **Transition is coming very quickly!**
 - Most reports are extremely conservative
 - Apply generally, but faster in many regions.
- **Very important to start incorporating AVs into planning now.**
 - To realize the benefits of AVS.
 - Sacrifice expansion for maintenance.

NATIONAL ECONOMIC
EDUCATION DELEGATION

27

What Changes Will This Bring?

- | | |
|--------------------------------|--------------------------------|
| • Disposable Income | • Public Transportation |
| • Housing | • Infrastructure |
| • Government Finances | • Employment |
| • Transportation demand | • Parking |

Potentially dramatic improvements in infrastructure planning and maintenance - Data sharing and integration

NATIONAL ECONOMIC
EDUCATION DELEGATION

28

Employment

- **Massive job displacement/relocation (Millions!):**
 - Drivers of all varieties: truck, taxi, delivery...
 - Car production jobs, car parts production jobs
 - Gas station, vehicle repair, and body shop
 - Police and fire
 - Health care workers
 - And so on...

NATIONAL ECONOMIC
EDUCATION DELEGATION

29

Parking

- **Greatly reduced demand for parking lots.**
- **Service providers will own parking lots in strategic places.**
 - where the cost of land is low
- **Street parking will largely be a thing of the past.**
 - More green space in cities
- **Shopping mall parking will be converted to:**
 - More shopping mall? Housing?
- **Apartment complexes will convert parking.**

NATIONAL ECONOMIC
EDUCATION DELEGATION

30

Freeing Up Urban Space from Parking

- **Los Angeles: 14% of incorporated land area**
 - 200 Square miles
- **San Francisco: 275,450 on-street parking spaces**
 - Enough to parallel-park a line of cars 60 miles longer than California's entire 840-mile coastline
 - Enough parking to fill parking lots that would cover the **Presidio, Golden Gate Park, and Lake Merced.**
- **Nationwide: (estimate) 500 million spaces**
 - That's larger than Delaware and Rhode Island combined.
 - Could be as many as 2 billion (add in Connecticut and Vermont).

31

Summary of Change

- **Massive employment upheaval.**
- **Local government finances will look very different.**
- **Housing will be easier to build and more plentiful.**
- **Parking conversions will be commonplace.**
- **Demand for transportation infrastructure will likely decline.**
 - Transportation infrastructure technology will be a booming business.
- **Demand for public transportation may well decline.**

32

Thank you!
