Increased Savings

- Historical evidence generated by economists ranging from Milton Friedman (1957) to Marjorie Galenson (1972) to Marcus Alexis (1971) to Gittelman and Wolff (2004).....
 - All find that after accounting for household income, Blacks have a slightly higher savings rate than Whites.
- Risk and reward are higher for White investors
 - Controlling for income, this is not clear.
 - Access to and tolerance for higher risk investments is clearly correlated with income.

30

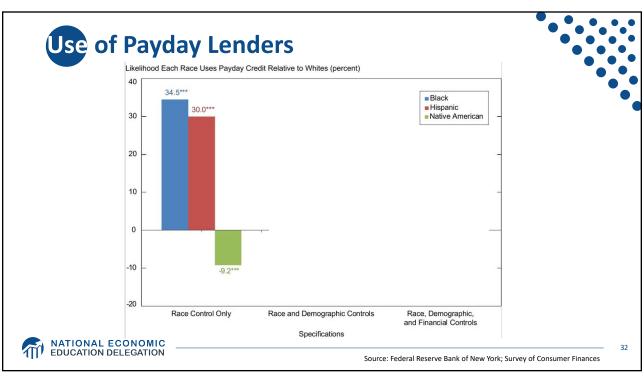

Financial Literacy

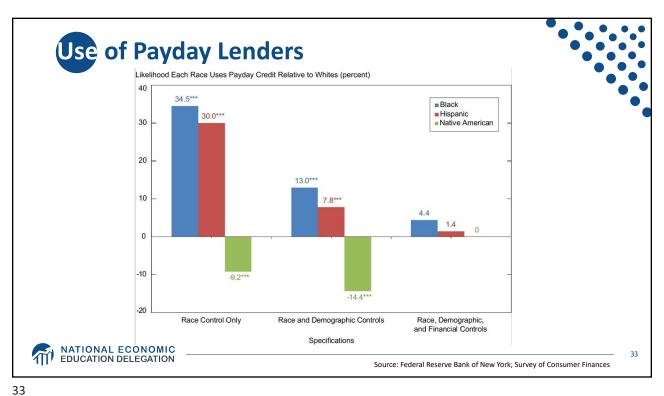

- Financial literary helps explain individual wealth differences within racial groups, but none of the wealth differences between racial groups.
 - The insufficient financial literacy argument is often leveled specifically at Black households.
 - The argument holds equally with regard to all households of comparable incomes.
- Controlling for household income, there is no difference in rates of asset appreciation between Black and White households.

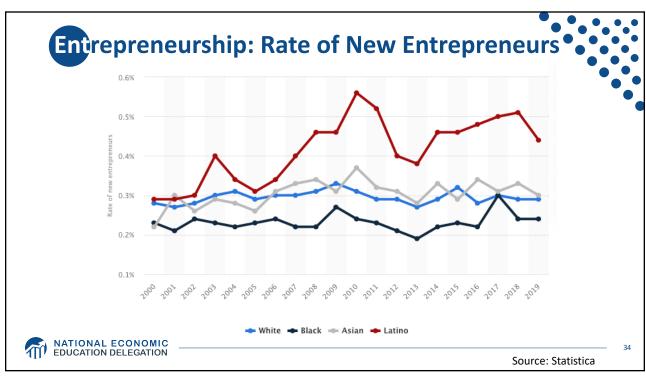

31

31

Explaining Differences in Entrepreneurship

- Disparities in access to capital:
 - Wealth disparities
 - o Specifically differences in home equity.
 - o Differences in wealth levels of friends and family.
 - Less likely to rely on banks and more likely to rely on credit cards.
 - Loans have higher int rates and more likely to be declined.

Summary

- Mean: White wealth is 6.9x Black wealth
- Median: White wealth is 7.8x Black wealth
- There are many explanations in the common narrative.
 - Many do not stand up to scrutiny.
- Government policies have contributed enormously this gap.
 - Racial dehumanizing permitted these policies.
- Wealth endowments (parental wealth) are enormously important for determining own wealth in adulthood.
 - Policies that address this relationship are most likely to be effective.
- Some form of policy intervention is likely necessary if the gap is to be closed.
