

Osher Lifelong Learning Institute, Winter 2025

Contemporary Economic Policy

Berkshire Community College

Host: Geoffrey Woglom, Ph.D.
Director, National Economic Education Delegation

Available NEED Topics Include:

- US Economy
- Healthcare Economics
- Climate Change
- Economic Inequality
- Economic Mobility
- Trade and Globalization
- Minimum Wages
- Immigration Economics
- Housing Policy
- Federal Budgets
- Federal Debt
- Black-White Wealth Gap
- Autonomous Vehicles
- US Social Policy

Course Outline

- **Contemporary Economic Policy**

- Week 1 (1/21): Economic Update (Geoffrey Woglom, Amherst College)
- Week 2 (1/28): Federal Debt and Deficits (Robert Rebelein, Vassar College)
- Week 3 (2/04): Health Economics (Robert Rebelein, Vassar College)
- Week 4 (2/11): The New Inequality (Geoffrey Woglom, Amherst College)
- **Week 5 (2/18): Tariffs and Their Effects (Alan Deardorff Umichigan)**
- Week 6 (2/25): Climate Change Economics (Sarah Jacobson, Williams College)

Submitting Questions

- **Submit questions in the chat or by raising your digital hand.**
 - I will try to handle them as they come up.
 - **Handle Questions As you see fit.**
 - **We will do a verbal Q&A once the material has been presented.**
 - **Slides will be available from the NEED website tomorrow (https://needelegation.org/delivered_presentations.php).**
- I suggest posting this URL in the Chat.**

Tariffs and Their Effects

Presentation to Berkshire Community College
February 18, 2025

NATIONAL ECONOMIC
EDUCATION DELEGATION

What Is a Tariff?

- **A tariff is a tax on imports.**
- **Much like, say, the 6% sales tax in Michigan,**
 - Whatever price the seller charges, the buyer pays an extra 6% that goes to the government.
- **A 10% tariff on all imports (such as Trump has proposed) would mean that**
 - Whatever the foreign exporter charges for a product,
 - US buyers will pay an extra 10% to the US government.
- **Might the seller charge a lower price because of the tariff?**
 - Perhaps, but when Trump used tariffs in 2018 on steel and China, they did not.

EDUCATION DELEGATION

Trump Tariff Exemptions

- September 18, 2018:

The Washington Post

Trump's tariffs won't bite Apple, illustrating Tim Cook's political sway

- "Clearly Tim Cook has been effective in his developing a relationship with the current administration, and this is probably one of the best examples of the fruits of that labor."

NATIONAL ECONOMIC
EDUCATION DELEGATION

20

Trump Tariff Exemptions

- Both the metals tariffs and the China tariffs permitted certain products and product categories to be exempted, through an application process to Commerce (metals) and USTR (China), if certain criteria are satisfied.
 - Whether tariffs would impose significant harm on American business interests
 - Whether substitute products were available outside China
 - Whether the products were “strategically important” to China”

Trump Tariff Exemptions

Figure I. Section 301 Exclusions (Through Jan. 2020)

Source: CRS with information from the Office of the USTR.

Trump Tariff Exemptions

- **Requests for exemption**
 - Metals tariffs: “Commerce Department received nearly 500,000 exclusion requests”
 - China tariffs: USTR “fielded more than 50,000 requests”
- **“He has also suggested targeting particular companies or industries.”**
- **Lobbying Congress on trade issues increased once Mr. Trump took office**
- **Biden maintained Trump’s tariffs, but it**
 - gradually wound down the exclusions for China tariffs
 - continued to grant them for tariffs on steel and aluminum.

Trump Tariff Exemptions

- **Trump administration’s decisions on exclusions were mysterious and arbitrary.**
 - “Tariff exemptions were given
 - to Bibles but not to textbooks,
 - to salmon but not to pollock,
 - to children’s car seats but not to baby cribs.
 - The decisions were not subject to appeal.”

Trump Tariff Exemptions

- **Issues with the exemptions**

- “Firms hiring lobbyists were less likely to have steel tariff exemptions approved.”
- Study found:
 - Contributions to Republicans made China exemptions more likely
 - Contributions to Democrats made China exemptions less likely
 - Author quoted as saying the exclusion process was “a very effective spoils system”
- Renewal of exemptions were uncertain and came late enough to create uncertainty.

Trump II Tariffs

Trump II Tariff Plans

- **“To me the most beautiful word in the dictionary is ‘tariff’”**
- **During campaign he said he will**
 - Place a tariff of 10% or 20% on all imports from all countries.
 - Place even higher tariffs (60%) on imports from China.
 - Raise our tariffs on countries to match what they charge on our exports.
 - “Reciprocal Trade Act”
 - (And lower those where they charge less?)
 - Raise tariffs on countries that don’t use the US dollar for international transactions.
 - Place tariffs on Mexico, violating his own USMCA trade agreement
 - 25% on everything if they don’t stop US immigration
 - 100% on cars to get production in US

Trump II Tariff Plans

- **After the election he said he threatened:**
 - Nov 26: New tariffs unless they stop people and drugs crossing border
 - 25% on Mexico and Canada
 - Extra 10% on China
 - Nov 30: 100% Tariffs on Brics if they undermine the US dollar
 - Brics = Brazil, Russia, India, China and South Africa
 - Expanded to include Iran, United Arab Emirates, Egypt and Ethiopia
 - A proposal for a Brics currency was introduced at last year’s summit in South Africa.
 - Jan 7: Tariffs on Denmark if it doesn’t allow US to buy Greenland

Trump II Tariff Actions

- **After inauguration, as President he:**

- Jan 16: Threatened tariffs on Colombia if it doesn't allow his deportation flights to land
 - o They first threatened retaliatory tariffs, but then permitted flights to land and Trump retracted the threat

Trump II Tariff Actions

- **After inauguration, as President he:**

- Feb 1: Announced tariffs of 25% on Canada and Mexico and 10% on China if they didn't stop flows of illegal people and drugs across the borders
 - o After talks with leaders he postponed the tariffs on Canada and Mexico for one month
 - o The 10% additional tariff on China
 - Went into effect Feb 4
 - China retaliated with more tariffs on US

Trump II Tariff Actions

- **After inauguration, as President he:**

- Feb 1: Announced repeal of “de minimis” tariff-free policy on imports from China
 - o For years, imports under \$800 have entered US tariff free
 - o Feb 7: Paused the repeal as packages piled up at customs

Trump II Tariff Actions

- **After inauguration, as President he:**

- Feb 3: Trump “hinted” that EU would be next
 - o "They don't take our cars, they don't take our farm products, they take almost nothing and we take everything from them. Millions of cars, tremendous amounts of food and farm products," he told journalists. [BBC]

Trump II Tariff Actions

- **After inauguration, as President he:**

- Feb 13: Trump starts work on “reciprocal tariffs”
 - o “Trump Says He’ll Rework Global Trading Relations With ‘Reciprocal’ Tariffs” [NYT]

Trump II Tariff Plans

- **What will Trump actually do?**

- Beattie in FT 11/18/24: “trade policy in his first administration emerged from fierce internal battles like a **victorious but bloodied rat crawling out of a sack of rodent corpses**, with Trump’s caprice determining which idea survived.”
- He will surely do some of the things on this list
- But not on everybody. He’ll use threats to negotiate “deals”
 - o For the benefit of the country (?)
 - o For the benefit of himself (!)

Trump II Tariff Plans

- **What will Trump be able do?**

- The US Constitution gives power over tariffs only to Congress, not the President
- But Congress has passed laws delegating that power to the President in certain circumstances:
 - o Section 201 of 1974 Trade Act: Safeguards, used for washing machines
 - o Section 232 of 1962 Trade Act: National security, used for steel
 - o Section 301 of 1974 Trade Act: Unfair trade, used for China tariffs
 - o International Emergency Economic Powers Act of 1977,
 - Did not use in his first term
 - But threatened against Mexico in 2018 over migration
 - Did use on Feb 1 for tariffs on Canada, Mexico, and China
- For his tariffs on all imports, he may need to get Congress to act, but Beatie in FT disagrees
- Reciprocal Trade Act would have to be by Congress

Trump II Tariff Plans

- **Use of International Emergency Economic Powers Act**

- Posted by White House Feb 1, 2025:

ADDRESSING AN EMERGENCY SITUATION: The extraordinary threat posed by illegal aliens and drugs, including deadly fentanyl, constitutes a national emergency under the International Emergency Economic Powers Act (IEEPA).

Effects of Tariffs in General

Economic effects of a tariff

- **A tariff is a tax on imports. It causes**
 - A rise in the price of the imported good in the importing country
 - A fall in the price of the imported good in the exporting country
 - The quantity imported to fall
 - Revenue for the tariff-levying government
- **Almost always: the rise at home is much larger than the fall abroad**
 - That's especially true if importing country is small
 - But it's also true if importing country is as large as the U.S.
 - We learned this from Trump's tariffs in 2018.
 - Example: Trump's tariffs caused US prices to rise, with hardly any perceptible fall in prices abroad.

Effects of a tariff

- **The rise in price in the importing country causes**
 - A rise in price of competing goods produced there
 - Benefits to those producers
 - Harm to buyers of both the import and the competing goods
 - Including producers that use the higher-priced goods as inputs
 - Their prices also rise, hurting their buyers
 - Employment changes:
 - Increase in the protected industry
 - Decrease in industries that use the protected product as inputs
 - Example: Trump's 25% tariff on steel
 - Helped US steel firms and their workers
 - Hurt US auto firms and workers
 - and many other industries that use steel
 - Study found it cost more jobs lost outside steel than gained inside

Effects of a tariff

- **Economists' cost-benefit analysis quantifies these and shows that**
 - Unless there are market distortions, the costs of a tariff always exceed the benefits
 - Even when distortions give potential for tariff to be net beneficial
 - It is just as likely to be net harmful
 - And there does exist another policy, not a tariff, that would be better
 - But
 - Costs of tariffs are spread over many buyers, and are small for each
 - Benefits of tariffs are concentrated for domestic producers and are large for each
 - That's often why we
 - Get tariffs
 - Find them very hard to remove

Effects of a tariff

- **Politics of tariffs**

- Political forces favor tariffs
- Tariffs were reduced during 1934-1995 only by slow reciprocal negotiation among countries

Effects of a tariff

- **If a tariff is on exports of only one country (e.g., China), then**

- Some imports shift to another country
- Price rises by less, to that other country's higher cost
- Example: See next slide for Christmas Lights

Effects of Trump I on Christmas Lights

Cambodia Passed China as Top US Supplier of Christmas Lights

After tariffs on China took effect, production move to Cambodia

Source: Xeneta, US Census Bureau

Bloomberg

A few key things are unclear in the case of Christmas lights that Xeneta analyzed, like whether the production actually moved from China or whether the goods were merely diverted and then packaged in Cambodia by Chinese affiliates.

NATIONAL ECONOMIC
EDUCATION DELEGATION

43

Effects of a tariff

• Do tariffs reduce a trade deficit?

- Trump thinks so, but the US deficit grew under him (see above)
- A trade deficit equals **Expenditure minus Income**
- There is no reason for tariffs to reduce expenditure
- And unless in a recession, also no reason for tariffs to raise income
- So NO!

NATIONAL ECONOMIC
EDUCATION DELEGATION

44

Effects of a tariff

• Government revenue

- Could Trump's proposed tariffs replace the US income tax?
- NO!
- If imports did not fall (they would!), his tariffs would have collected in 2023:
 - o 60% on US goods imports from China, $0.6 \times \$0.43\text{tr} = \0.26tr
 - o 20% on US goods imports from non-China, $0.2 \times \$3.40\text{tr} = \0.68tr
 - o Total: \$0.94tr
- US federal income tax revenue in 2023 was \$2.18tr
- So his tariffs would collect AT MOST less than half of the income tax

Other effects of a tariff

• Income distribution

- Tariffs, especially on China, raise prices of the products disproportionately bought by low-income consumers, hurting them more than high-income consumers

• Retaliation

- Other countries place tariffs on US exports
- Trade war that started in 2018 continues and gets worse

• Corruption

- Historically, tariffs prompted both smuggling and bribes to customs officers
- Today, in the US, those are less likely.
- But requests for exemptions from tariffs may be accompanied by favors or political contributions

Effects of Trump II Tariffs

What Countries will Be Hurt?

Losing America's import demand would hurt

Share of total goods exports flowing to USA in 2023, per cent

Effects of Trump II Tariffs

- Source: Warwick McKibbin, Megan Hogan, and Marcus Noland, "The International Economic Implications of a Second Trump Presidency," Working Paper 24-20, Peterson Institute of International Economics, September 2024

- They use a large computer model of both microeconomics and macroeconomics to calculate effects of
 - Deportation of 8.3 million unauthorized immigrant workers
 - Tariffs
 - 10% on all imports
 - 60% on imports from China
 - Erosion of Federal Reserve independence
- Results below only for the 2 sets of tariffs
