 NATIONAL ECONOMIC
EDUCATION DELEGATION

1

1

National Economic Education Delegation

- **Vision**
 - One day, the public discussion of policy issues will be grounded in an accurate perception of the underlying economic principles and data.
- **Mission**
 - NEED unites the skills and knowledge of a vast network of professional economists to promote understanding of the economics of policy issues in the United States.
- **NEED Presentations**
 - Are **nonpartisan** and intended to reflect the consensus of the economics profession.

 NATIONAL ECONOMIC
EDUCATION DELEGATION

2

2

Who Are We?

- **Honorary Board: 48 members**

- 2 Fed Chairs: Janet Yellen, Ben Bernanke
- 6 Chairs Council of Economic Advisers
 - o Furman (D), Rosen (R), Bernanke (R), Yellen (D), Tyson (D), Goolsbee (D)
- 3 Nobel Prize Winners
 - o Akerlof, Smith, Maskin

- **Delegates: 500+ members**

- At all levels of academia and some in government service
- All have a Ph.D. in economics
- Crowdsource slide decks
- Give presentations

- **Global Partners: 45 Ph.D. Economists**

- Aid in slide deck development

Available NEED Topics Include:

- US Economy
- Climate Change
- Economic Inequality
- Economic Mobility
- US Social Policy
- Trade and Globalization
- Trade Wars
- Immigration Economics
- Housing Policy
- Federal Budgets
- Federal Debt
- 2017 Tax Law
- Autonomous Vehicles

Credits and Disclaimer

- **This slide deck was authored by:**

- Jon Haveman, Executive Director, NEED
- Geoffrey Woglom, Amherst College, Emeritus

- **Disclaimer**

- NEED presentations are designed to be nonpartisan.
- It is, however, inevitable that the presenter will be asked for and will provide their own views.
- Such views are those of the presenter and not necessarily those of the National Economic Education Delegation (NEED).

What Does the U.S. Gov't Budget Look Like?

Fiscal 2020 Budget Summary

Revenue	Billions		Outlays	Billions
Income Taxes	\$1,609	Programmatic Outlays	Mandatory	\$2,315
Payroll Taxes	\$1,310		Discretionary	\$3,850
Corporate Taxes	\$212		Interest	\$387
Other	\$289			
Total	\$3,420		Total	\$6,552

Budget Deficit **\$3,132**

Past and Future of Deficits

Figure 1.

Total Deficits and Surpluses

Percentage of GDP

Useful Deficit Decompositions:

$$\begin{aligned} \text{Total Deficit} &= (\text{Programmatic Outlays} + \\ &\text{Interest Expense}) - \text{Revenue} \\ &= (\text{Programmatic Outlays} - \\ &\text{Revenue}) + \text{Interest Expense} \end{aligned}$$

$$= \text{Primary Deficit} + \text{Net Interest}$$

Data source: Congressional Budget Office. See www.cbo.gov/publication/56996#data.

Source: Congressional Budget Office, The Budget and Economic Outlook: 2020 to 2030, 9/20

The Effect of the American Rescue Plan

Good News (?); 2021 deficit is still less than the 30% deficit in 1943

Sources: Congressional Budget Office, The Conference Board.

Debt vs. Deficit

The Sum of All Past Deficits Less Surpluses Equals the Debt

A Breakdown of the Total Federal Debt

As of 4/8: total public debt, \$28.1 tr, held by the public, \$21.0 tr.

As of 1/21, Japan holds \$1.28 tr
China Holds \$1.1 tr:
<https://ticdata.treasury.gov/>

Not All Debt Is Created Equal

Intra-governmental debt is important bookkeeping.

- This debt **DOES NOT** require funding on credit markets

- **Debt held by the public**

- This debt is funded by borrowing on credit markets and competes with private funding.

- **Most analyses focus on the publicly debt *relative* to GDP because:**

- To the extent that debt and deficits have burdens these burdens depend on the size of the debt *relative* to the size of the economy.

Two Measures of the Debt

CBO: Budget Analysts in Chief

- The Congressional Budget Office was founded in 1974 to provide Congress with information about the budgetary implications of legislation.
- Two kinds of Reports
 - Cost Estimates – Budgetary Effects of Raise the Wage Act of 2021
 - Projections of Debt and Deficits – The Budget and Economic Outlook: 2020 to 2030

Relative Debt since 1940 and Projections

Figure 2.

Federal Debt Held by the Public

Percentage of GDP

Data source: Congressional Budget Office. See www.cbo.gov/publication/56996#data.

GDP = gross domestic product.

Key Points About the U.S. Relative Debt

1. Relative debt peaked during WWII (106%) - followed by a steady decline until the 1980s.
2. Prior to 1983, relative debt rose purposefully (wars, recessions, infrastructure) and then fell.
3. Recently, relative debt has been and is expected to continue to rise for the next 30 years w/o strategic purpose.

Debt Dynamics

- Between 1946-1974, relative debt fell continuously in spite of deficits in 21 of the 29 years, with the debt increasing by 42%.
How?
- 1946-1974, deficits caused the debt to grow, but not as fast as GDP.
- While the debt grew by 42%, GDP (nominal) grew by 550%

You don't need a surplus to reduce the *relative* debt

Traditional Views of the Cost of the Debt

- **First a non-issue: The analogy between household and government debt is inaccurate.**
 - The government does not have to pay back the debt.
 - Retirees cash in maturing bonds which are financed with new bond issues sold to younger people.
 - Interest on the debt is essentially paid by the young to their parents
- **Economist View of the Debt circa 1980, very little cost because relative debt is falling. That changes in 1983.**

Traditional View: Debt and Deficits Raise Interest Rates

1. **Crowding Out:** Higher interest rates lead to less investment and over time to a smaller capital stock and reduced future output.
2. **Foreign Borrowing:** Higher interest rates lead to foreign capital inflows or foreign borrowing. With foreign borrowing, some of our GDP is paid to foreigners as interest.

The Dog that Didn't Bark; Rising Interest Rates?

NATIONAL ECONOMIC
EDUCATION DELEGATION

19

19

Olivier Blanchard's Presidential Address to the AEA 1/2019

“If the future is like the past [with low interest rates],...the issuance of debt without a later increase in taxes may well be feasible. Put bluntly, public debt may have no fiscal cost.”

But,

“My purpose...is not to argue for more public debt, especially in the current political environment. It is to have a richer discussion of the costs of debt...than is currently the case.”

NATIONAL ECONOMIC
EDUCATION DELEGATION

20

20

What the Traditional View Got Wrong

- **The growth rate in debt :**
 - One part of the debt grows at the interest rate.
 - Total debt grows *by more* than the interest rate when there is a primary deficit.
- **The traditional view assumes that the interest rate on debt is greater than the growth rate of GDP**
 - So, there must be a *primary surplus* to offset the interest rate
 - i.e., programmatic outlays must be less than revenues to stabilize the debt.

An Almost Free Lunch

- If the interest rate is *less* than the growth rate of GDP, then Debt to GDP can be stabilized with a (small) *primary deficit*: programmatic outlays can be less than revenues!
- **Blanchard does believe that the relative debt must be stabilized**
 1. At some point deficits must be reduced.
 2. But it may not be crucial at what level of debt we stabilize.

Blanchard's Evidence

Since 2000
(except for
recessions),
which is bigger?

But why must the relative debt be stabilized

- For practical purposes, the US cannot default on its debt, but...
- International investors, however, can still lose if the exchange value of the dollar falls.
- Remember, foreign holdings of the public debt amount to 40 percent of the total

Why do Foreigners Buy US Treasuries?

- **Market for Treasuries is the deepest, the most liquid and safest capital market in the world.**
- **What would happen if foreigners lost confidence in the stability of the dollar?**

CBO, *The 2020 Long-Term Budget Outlook*, 9/2020

The risk of a fiscal crisis appears to be low in the short run despite the higher deficits and debt stemming from the pandemic.... Nonetheless, the much higher debt over time would raise the risk of a fiscal crisis in the years ahead.

What would a Fiscal Crisis Look Like?

Foreigners lose confidence in the dollar and sell Treasuries in exchange for assets denominated in their own currency,

1. Sale of Treasuries raises interest rates, worsening or fiscal outlook.
2. Trading of Foreign for US assets lowers US exchange rate.
 - a. Raising the price of imports thereby increasing inflation.
 - b. Lowering the foreign currency returns on all US assets, exacerbating 1.

Could the Fed Bail us Out?

1. It could buy Treasuries and prevent the rise in interest rates.
2. Insufficient foreign assets to prevent the fall in the exchange rate,

27

28

Bottom Line: We Need to Worry about the Debt

1. Interest rates may not stay this low forever.
2. A fiscal crisis should be avoided at all costs.
3. The good news is we may be able to stabilize the relative debt without a running a surplus.

But, we must substantially reduce deficits after the pandemic: CBO (9/2020) suggests deficits in 2025 be reduced from 5 to 2.5 percent of GDP, but it won't be easy

Thank you!

Taking It One Step Further: (St. Augustine)

Jason Furman and Larry Summers, 12/1 presentation to Brookings

- **Low Interest Rates are Here to Stay, but not clear why.**
 - private saving higher due to longer retirement periods, increased inequality, and rising uncertainty.
 - Bernanke's "Savings Glut" from China and Japan
- **Low Interest Rates Are a Problem:**
 - Fed fights recessions by lowering interest rates. This time by 2.25 pct. pts, vs. 6.3 pct. pts on average in the past recessions.
 - Low interest rates lead to financial instability in "search for yield."

 NATIONAL ECONOMIC EDUCATION DELEGATION

<https://www.brookings.edu/wp-content/uploads/2020/11/furman-summers-fiscal-reconsideration-discussion-draft.pdf>

Furman & Summers Conclude

1. Low Interest Rates Imply Public Investment may be quite profitable.
2. Expand Debt-Financed Public Investment *as long as* there are profitable investments and interest rates are at moderate levels (Good Reason to Borrow #2).
3. But, infrastructure investment is stimulus and there may not be room for it in 2021 (which is why Summers that ARP was too big)

33

Bending the Curves!

34

You've Convinced Me: Let's Act Now!

Janet Yellen as reported in *Bloomberg*, 1/19/21: "Right now, short term, I feel that we can afford what it takes to get the economy back on its feet, to get us through the pandemic," Yellen told the Senate Finance Committee, highlighting that interest rates are historically low...

Yellen said that "it's essential we put the federal budget on a path that's sustainable" over time, but that the situation will be worse if investments aren't made now to support economic growth.

Legitimate Disagreement

Douglas Holtz-Eakin's views have evolved:

- In April: "I'm a fiscal hawk from way back, and all of my heebie-jeebies are going off when I see these numbers, but then I look at the scale of the problem, and I think, yeah, that's that. Gotta do it." *Politico*, 4/29
- In January: "Facts are stubborn things; and whatever may be our wishes, our inclinations, or the dictates of our passion, they cannot alter the state of facts and evidence." It is useful to remember the words of the 2nd president as we are bombarded daily by administration spokespeople about the dire state of the economy and the need for (another) multi-trillion dollar federal response

Much of the March Stimulus Was Saved

Estimates that personal saving increased by up to \$1.56 trillion between March and November, *Why Markets Boomed in a Year of Human Misery*, NYT, 1/1/21

\$2,400 was sent to joint filers with AGI of \$150,000 (Median Household Income is about \$70,000).

Compare this to enhanced unemployment benefits, which are **targeted** at households in distress

500-1,000	1,860	1.1	0.0	0.0	-30	0.0	25.0
More than 1,000	790	0.5	0.0	0.0	20	0.0	29.5
All	175,540	100.0	3.8	100.0	-3,060	-3.1	14.9

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0920-2).
 Number of AMT Taxpayers (millions). Baseline: 0.1 Proposal: 0.2
 (1) Calendar Year. Baseline is the law currently in place as of March 7, 2021. Includes certain provisions affecting: economic impact payments (additional recovery rebates for individuals); child tax credit (CTC); child and dependent care tax credit (CDCTC); and earned income tax credit (EITC). See Tables T21-0036, T21-0037, and T21-0030 through T21-0035 for details of the proposals included. These estimates revise TPC's earlier analysis in which the non-filer take-up rate for the childless EITC was too low. <http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>
 (2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>
 (3) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate tax; and excise taxes.
 (4) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.
